Support for Blue Sky renewable energy over 90,000 strong and growing

Every year, more and more Rocky Mountain Power customers choose to go above and beyond to support renewable energy with Blue Sky. In 2012 alone, Blue Sky participation increased by more than 9 percent and in May 2013, the Blue Sky program reached an exciting milestone by surpassing 90,000 participants. As the participation in Blue Sky continues to grow, Blue Sky customers shine as leaders in green power. See the chart for a look at Blue Sky participation over the years.

the environment by saving paper; you'll also make life easier, giving you more time to enjoy the things you want to do! To learn more visit our [paperless billing page](#).

Be wattsmart

Find tips and resources that help you cut your energy use and save on your bills month after month with wattsmart! You may even qualify for wattsmart programs and incentives that pay you to reduce your energy use. Visit the [wattsmart](#) page to learn more!

Renewable energy project tour heads to Cowboy country!

The 4th annual Rocky Mountain Power Blue Sky renewable energy project tour headed to Laramie, Wyoming for a fun, educational and windy day. The tour featured a trip to the company's High Plains wind energy facility and the University of Wyoming's Bim Kendall House, home of a solar project that received Blue Sky funding!

Park City nonprofit goes solar with Blue Sky

The National Ability Center in Park City, Utah is a global leader in adaptive recreation that helps transform thousands of lives every year by building self-esteem, confidence and lifetime skills through affordable sport, recreation and educational programs. With the help of Blue Sky customers, the nonprofit organization installed a 30.09-kilowatt solar array on the rooftop of the administration building.
