Dear Blue Sky Business,

Thank you for supporting renewable energy through our Blue SkySM program.

In 2009, your business supported XXX,XXX kilowatt-hours of Blue Sky renewable energy. The renewable energy you supported avoided the release of XXX,XXX pounds of carbon dioxide – that's like planting XX trees or not driving a typical car XX,XXX miles.

Your company made a difference in 2009

We've enclosed a personalized Certificate of Recognition for your business to acknowledge the difference you made in 2009. This Certificate of Recognition will help you promote your business' support of renewable energy to customers, employees and stakeholders.

You and 71,000 Blue Sky customers across our service area supported more than 576 million kilowatt-hours of renewable energy. This is equivalent to the output of 133 utility-scale wind turbines.*

Did you know that over the past three years, Blue Sky customers have helped fund nearly 80 community-based renewable energy projects throughout our service area to help advance renewable energy visibility and education? Visit rockymountainpower.net/blueskyprojects to learn more.

Our commitment

Protecting and enhancing the environment is at the forefront of our business strategy. We believe in building an increasingly sustainable energy supply and delivery business. Our sustainable efforts include investments in renewable energy generation, energy efficiency, environmental education and service, and habitat protection. Together with your support of Blue Sky and company investments, we are making a difference that will last for generations.

For information, visit rockymountainpower.net/environment.

Thanks to you, we're looking forward to Blue Sky's continued success in 2010 and beyond! Please feel free to contact us at **1-800-769-3717** if you have any questions about the program.

Sincerely,

Karen Gilmore
Vice President, Customer Services

For Blue Sky customer updates, visit rockymountainpower.net/supportbluesky and read the online *Forecast* newsletter (updated in the spring and fall).

The environmental benefits figures in this letter are based on data and calculations provided by the U.S. Environmental Protection Agency.

*Based on 1.5MW wind turbines with a 33 percent capacity.
