Thank you for supporting renewable energy through Rocky Mountain Power's Blue SkySM program.

2008 – All about you!

We're pleased to present **your personalized 2008 Blue Sky support details** to show you the difference you've made:

- Your current purchase is **XX** block(s) per month.
- Your total 2008 Blue Sky purchase of **X** kilowatt-hours helped avoid the release of **X** pounds of carbon dioxide emissions into the air,
- providing environmental benefits equivalent to not driving **X** miles.

In total, 67,000 Blue Sky customers supported 490 million kilowatt-hours of Green-e Energy certified renewable energy in 2008 — that's equal to the output of 107 wind turbines.

Your participation helped support emission-free wind energy from newly developed wind farms in the region. In addition to the renewable energy credits purchased on your behalf, 15 community-based solar, wind and other renewable energy projects throughout the company's service area received funds to help advance renewable energy technology. Visit rockymountainpower.net/blueskyprojects to learn more.

And to see our combined renewable accomplishments, visit rockymountainpower.net/renewablemap.

Stay informed

Read our *Forecast* newsletter on our Web site (rockymountainpower.net/forecastnl) in April and September, to stay up to date on the Blue Sky program.

Thanks to you, we're looking forward to Blue Sky's continued success in 2009 and beyond! Please feel free to contact us at **1-800-769-3717** if you have any questions about the program. Let's turn the answers on.

Sincerely,

Karen Gilmore
Vice President, Customer Services

P.S. If you'd like to add to your Blue Sky purchase, you can change the number of blocks you're buying simply by filling out and returning the enclosed form in the postage-paid envelope. See form for details.

The environmental benefits figures in this letter are based on the average non-base load generation emissions from the Western Energy Coordinating Council (WECC) region, as updated September 2008, and on data and calculations provided by the U.S. Environmental Protection Agency (www.epa.gov/cleanenergy/energy-resources/egrid/index.html) and www.epa.gov/cleanenergy/energy-resources/calculator.html).
