

**ROCKY MOUNTAIN POWER  
ELECTRIC SERVICE SCHEDULE NO. 135**

**STATE OF UTAH**

\_\_\_\_\_  
**Net Metering Service**  
\_\_\_\_\_

**AVAILABILITY:** At any point on the Company's interconnected system.

**APPLICATION:** On a first-come, first-served basis to any customer that owns or leases a customer-operated renewable generating facility with a capacity of not more than twenty-five (25) kilowatts for a residential facility and two (2) megawatts for a non-residential facility that is located on, or adjacent to, the customers' premises, is interconnected and operates in parallel with the Company's existing transmission and distribution facilities, is intended primarily to offset part or all of the customer's own electrical requirements, is controlled by an inverter or, for non-residential applications, switchgear capable of enabling safe and efficient synchronous coupling with Rocky Mountain Power's electrical system. This provision shall be available until the time that the total rated generating capacity used by the eligible customer-generators equals 4,424 kilowatts. At least half of the total rated generating capacity used by the customer-generators must be generated by renewable facilities. This schedule is offered in compliance with Utah Code Ann. § 54-15-101 to 106. (C)

**DEFINITIONS:** Net Metering means measuring the difference between the electricity supplied by the Company and the electricity generated by an eligible customer-generator and fed back to the electric grid over the applicable billing period. (C)

An Inverter means a device that converts direct current power into alternating current power that is compatible with power generated by the Company. (C)
