Dear Commissioners and Commission Staff:

1549431

RECEIVED

I am writing in regards to the recent changes to Rocky Mountain Power's Net Metering tariff Docket #: 08-035-T04 Schedule 135 - Net Metering Service, which have been conditionally approved by the Commission as of June 13, 2008.

Utah Clean Energy has been engaged in both the net metering docket (# 07-999-08) and interconnection docket (# 07-999-07) and/or their affiliated technical conferences, however we were unaware that any changes to the Net Metering tariff were being proposed and considered. We are aware that the proposed changes to the tariff are intended to ensure the existing tariff complies with the new statute and legislation (S.B. 84 - Net Metering Provisions).

Nevertheless, having been involved in the legislation and the related regulatory dockets for nearly two years, Utah Clean Energy would have appreciated a formal notification of the proposed changes and an opportunity to provide input on said tariff.

It has come to our attention that there may be other avenues to address this tariff in greater detail in a more formal public process (i.e. a docket proceeding or a technical conference). We are supportive of pursuing these options and are hopeful that there will be an opportunity for Utah Clean Energy and other stakeholders to get involved in and provide input on the net metering docket and tariff.

As you are well aware, the statute language defers decision-making authority to the Governing Authority (Public Service Commission) on critically important issues, and it is our sincere belief that a more in depth technical discussion and evaluation of these components are necessary to making a fair ruling on these complex issues.

As such, we look forward to the opportunity to work with the Commission, the Division, and involved stakeholders to address Utah's net metering tariff through a public process in the near future.

Thank you for your service and for your consideration of this important matter.

Sincerely,

Sara Baldwin
