Dear Commissioners and Commission Staff:

7008 JUL 29 A 8:12

45

Utah Clean Energy was recently made aware that the proposed changes to Rocky Mountain Power's Net Metering tariff Docket #: 08-035-T04 Schedule 135 - Net Metering Service are intended to update the Company's current tariff to make it consistent with the minimum requirements set forth in Utah's recently passed Senate Bill 84. We recognize and appreciate the efforts of the Commission, the Division, and the Company to update the tariff in a timely fashion.

RECEIVED

After further clarification from the Company, the Division, and Commission staff, it is our understanding that approving said changes does not preclude a formal public process to address the remaining issues deferred to the decision-making authority of the Public Service Commission in Senate Bill 84.

As such, Utah Clean Energy would like to clarify our position regarding Docket #: 08-035-T04 Schedule 135 - Net Metering Service. Utah Clean Energy supports the Commission's approval of the proposed changes to Schedule 135 - Net Metering Service, on the condition that the aforementioned issues are addressed through the existing net metering docket (# 07-999-08) and/or interconnection docket (# 07-999-07) and/or technical conference, as appropriate, in a timely fashion.

We look forward to the opportunity for involvement in this matter in the coming months.

Thank you for your consideration.

Regards,

Sara Baldwin
