RECEIVED

Re: Milford Wind Corridor
Docket No. 08-2490-01

Dear Commissioners:

The Millard County Commission is familiar with the Milford Wind Corridor Project. The County Commission has worked cooperatively with Milford Wind representatives for over a year on various aspects of the project. Milford Wind kindly accommodated a request from the county that the Project's transmission line be re-routed to avoid areas which are slated for future economic development under the county land use plan, allowing the county to maximize the potential of those lands.

The County Commission is pleased that portions of the Milford Wind Corridor Project will be located in our county. In addition to making renewable energy available, the project has the potential to bring jobs to Millard County.

On July 22, 2008, the County Commission approved Conditional Use Permits for Phases I and II of the Project, covering the wind farm and the interconnecting transmission line, finding among other things, that Milford Wind's proposed land use is necessary or desirable to provide a service or facility which will contribute to the general well-being of the county, and that it conforms to the goals, policies and governing principles of the Millard County General Plan.

We are supportive of the Project, and encourage the Commission's timely approval of the Certificate of Public Convenience & Necessity for Milford Wind to begin construction.

Sincerely,

Kathy Walker
Millard County Commissioner
