**“COOL KEEPER MANAGES ELECTRICITY DEMAND ON HOT DAYS.”**  
It's a wireless device that connects to your AC unit and during hot afternoons it turns your AC off and on every 15 minutes. You stay cool and it helps us manage peak energy demand and energy costs. Installation is free and you get a \$20 thank you credit each year. It's wattsmart. To learn more, go to [wattsmart.com](http://wattsmart.com).
