DPU Data Request 1.32

DPU Data Request 1.32

Regarding the affect on rates charged to customers as a result of the transfers, please provide the current rate schedules for Heber Light & Power. Please provide documentation of Mr. Moench's claim that the overall average increase in monthly charges will be less than \$5.00 assuming past usage continues (lines 563-565).

Response to DPU Data Request 1.32

Please refer to Attachment DPU 1.32 for a copy of Heber Light & Power's current rate schedules. The following documentation is provided in support of an overall average increase in monthly charges of less than \$5:

For the 12 months ended July 2010, total billings for the 992 RMP customers being transferred to Heber L&P would have been \$56,000 higher under Heber's rates than under RMP's rates. Dividing this increase by the 992 customers produces an average increase under Heber's rates of \$4.70 per month.
