DPU Data Request 1.11

DPU Data Request 1.11

Please provide (if any) the acquisition premium of the settlement, as well as supporting documentation. Who will be bearing the costs of the exchange, i.e., shareholders, RMP ratepayers, Heber ratepayers, etc.? Please identify any costs that Utah ratepayers will be expected to bear from the settlement and exchange or that the Company will file for rate recovery from this case.

Response to DPU Data Request 1.11

The transaction is a non-cash exchange of facilities. There is no acquisition premium. The cost of the exchange consists primarily of the costs of the facilities being acquired. (See Highly Confidential Attachment OCS 1.4.) The Company will seek to include the facilities it is acquiring, constructing, or installing in its rate base and will seek to recover operating and maintenance costs associated with providing service to its new customers.
