RECEIVED

Dear Service Commission,

I am writing because I am concerned about Rocky Mountain Power's recent rate hike request (Docket Number 10035124). We demand that any electric rate increase be fair and reasonable especially during this difficult economy. My Family and I continue to do all we can to conserve energy and this is our reward???

If this proposed rate increase goes through, my power bill could increase by up to 19 percent! In this tight economy, I simply can't afford to have more of my hard-earned dollars going to utility bills rather than grocery, housing or medical bills. Do you want state welfare to pick up the costs because we can no longer afford to pay for other services?

I demand that you balance the interests of utilities with those of residents here in Utah and reach a fair compromise that won't devastate family budgets.

Do it or get voted out. The Winn family

Sincerely,

Mr. Paul Winn
