Fee Schedule for non-recurring charges

1. Application Processing Fee (ENS or written) \$26.65 + \$4.00 per Pole

Exception: Rocky Mountain Power shall invoice Licensee the actual cost associated with processing applications on Rebuild projects.

2. Inspections

In instances when Rocky Mountain Power has sufficient electronic Pole attachment data existing in its system of record, Rocky Mountain Power may elect to perform a desktop inspection, which is defined as an inspection performed using only existing electronic data, maps and pictures. There are no inspection fees associated with a desktop inspection.

In instances when Rocky Mountain Power does not have sufficient electronic data to perform a desktop inspection or the desktop inspection results in findings that require a field visit, the following inspection fees apply:

2(a) Pre-Inspection Fees - these fees are based upon applications by various entities that wish to attach a cable, or other device, to Rocky Mountain Power's facilities and also occurs prior to when a Licensee wishes to place new cables and/or additional equipment. All pre and post-inspections are broken into three levels of time usage and complexity.

Level 1 (Visual Inspection) \$31.30 first Pole; \$17.65 each Pole thereafter

Level 1 inspections are defined as a "drive by" that does not require the inspector to exit the vehicle and are intended to identify that clearances and strength of the structure are visibly verifiable. These inspections are typically performed when Licensee has provided all required information given the type of request on the Application form.

Level 2 (Measured Inspection) \$41.20 first Pole; \$30.40 each Pole thereafter

Level 2 inspections are most commonly performed when the Poles do not appear to have proper clearance to accommodate the newly proposed attachment or when Licensee has failed to provide all required information given the type of request on the Application form.

Level 3 (Pole Analysis Inspection) \$88.55 first Pole; \$75.90 each Pole thereafter

Level 3 inspections are most commonly performed when the Poles do not appear to have proper strength to accommodate the newly proposed attachment or when Licensee has failed to provide all required information given the type of request on the Application form. This level of inspection is highly common on requests for use of transmission Poles.

Rocky Mountain Power shall not charge Pre-Inspection Fees for an application to remove attachments.

EXHIBIT B
SCHEDULE 1
PAGE 2 OF 2

2(b) Post-Inspection Fees - these inspections are completed after a pre-inspection has been approved, and the installation by the original requesting company has been completed.

Level 4 (Visual Inspection) \$31.30 first Pole; \$17.65 each Pole thereafter
Level 4 inspections are defined as a “drive by” that does not require the inspector to exit the vehicle and are intended to identify that Licensee has complied with the engineering data provided in the Application form. This level of inspection shall be used for all removals of attachments, unless the removal has resulted in damage to the Pole in which case additional fees to assess the damage may apply.

Level 5 (Measured Inspection) \$41.20 first Pole; \$30.40 each Pole thereafter
Level 5 inspections are most commonly performed when it appears that Licensee has failed to perform construction in accordance with the specifications on their Application form, has created a NESC violation or has attached to the Pole prior to receiving approval from Rocky Mountain Power.

Level 6 (Pole Analysis Inspection) \$88.55 first Pole; \$75.90 each Pole thereafter
Level 6 inspections are most commonly performed when it appears that Licensee has attached to a Pole prior to receiving approval from Rocky Mountain Power and the attachment appears to have compromised the integrity of the existing structure. This level of inspection is highly common on requests for use of transmission Poles.

3. Unauthorized Attachment Charge
\$100.00 + Back Rent, per Pole
Back Rent shall consist of 5 years of rent at the current Rental Rate.
(Reference Section 3.03)

4. Topping Fee
A charge of \$64.00 per Pole will be assessed, where Rocky Mountain Power completes a Pole replacement with an Attachment by the Licensee and the transfer of the Attachment requires removal of the top of the pole to be completed by Rocky Mountain Power.

5. Return Trip Fee
A charge of \$255.00 per Pole will be assessed, where Rocky Mountain Power completes a Pole replacement with an Attachment by the Licensee and the removal of the replaced Pole cannot be completed at the time of construction due to the Licensee’s Attachment; therefore, Rocky Mountain Power will return to the site once the Licensee transfer is complete. This charge is for the return trip, removal of the Pole is not included in this charge.
