Re: Rocky Mountain Power's Utah Demand-Side Management Semi-Annual Forecast
Docket No. 10-035-57

Dear Ms. Son:

On December 21, 2011, the Commission issued an order ("Order") acknowledging the Company's forecast of Demand Side Management ("DSM") program expenditures, acquisition targets and reported balancing account results for calendar year 2011. As part of this Order, the Commission directed the Company to prepare a supplementary filing reconciling projected DSM program savings with corresponding IRP targets.

On January 11, 2012, the Company filed supplemental information in response to the Commission's Order. The Division of Public Utilities ("Division") reviewed this information and recommends the Commission acknowledge the filing as being compliant with the Order. The Office of Consumer Services ("OCS") also indicates the Company's supplementary filing is sufficient for DSM forecasting purposes. OCS recommends the Commission direct the Company to refine these forecasts by reporting savings estimates for the DSM Irrigation Load Control program both in terms of total program participation and contribution to peak in future filings. The Commission agrees with this recommendation and directs the Company to incorporate this information in future filings.

Based on both the Division and OCS recommendations, the Commission acknowledges the Company's filing of the supplemental information pursuant to the Commission's Order.

Sincerely,

/s/ Gary L. Widerburg
Commission Secretary
