Re: Demand-side management (“DSM”) report pursuant to Commission order in
Docket No. 09-035-T08 regarding Phase I issues

Pursuant to Commission order in the above referenced docket,¹ Rocky Mountain Power (the “Company”) is required to provide to the Commission and Demand-Side Management Advisory Group on a semi-annual basis a demand-side management balancing account analysis similar to that originally provided by the Company in Advice No. 09-08.² In compliance with this requirement, the Company provides as Attachment A to this filing an analysis which projects the Utah demand-side management deferred account balance through December 2011.

As illustrated in Attachment A, the Company currently projects the demand-side management deferred account will reflect a balance owing to customers in the amount of approximately \$3.3 million as of December 2011, which represents approximately 6 percent of Schedule 193 revenues expected to be collected in calendar year 2011. The deferred account reflected a \$1.9 million balance owing to customers as of March 31, 2011.

Rocky Mountain Power believes the Schedule 193 collection rate is set at the appropriate level at this time. As always, the Company will continue to monitor the deferred account balance and will propose adjustments to the Schedule 193 collection rate in the future as appropriate.

An original and five (5) copies of this report are provided with this filing.

It is respectfully requested that all formal correspondence and staff requests regarding this matter be addressed to:

¹ Refer to the Commission’s August 25, 2009 order approving the phase 1 stipulation. Paragraph 10 of the stipulation, filed with the Commission on August 3, 2009, details the balancing account analysis reporting requirement.

² Filed with the Commission on June 11, 2009.
