1	DECEMBER 6, 2010 9:03 A.M.
2	<u>PROCEEDINGS</u>
3	CHAIRMAN BOYER: This is the time and place
4	duly noticed for the hearing on the settlement
5	stipulation in Docket No. 10-035-89, captioned: In
6	the Matter of the Application of Rocky Mountain Power
7	For Alternative Cost Recovery For Major Plant
8	Additions of the Populus to Ben Lomond Transmission
9	Line and the Dunlap I Wind Project.
10	And for the record, we've had a preliminary
11	discussion off the record discussing two issues. The
12	first of which is the necessity to substitute an
13	exhibit to the stipulation. So it will be an
14	amendment to the stipulation.
15	And we'll Rocky Mountain Power will
16	address that in just a moment. And the second thing
17	is the admission of prefiled direct testimony in this
18	matter.
19	So we'll deal with those things first. And
20	then our intent will be to proceed by hearing
21	witnesses supporting the stipulation. And then any
22	opposing, if any opposing. And then those proponents
23	will have the last word if there are opponents to the
24	settlement stipulation.
25	So let's turn first to the Exhibit 2

1 substitution, or however we're gonna call that. And we'll turn to Ms. Hogle to address that, please. 2 3 MS. HOGLE: Good morning Commissioners. My name is Yvonne Hogle, and I have here with me David L. 4 5 Taylor, who are here behalf of the Company. And I 6 will let Mr. Taylor address the Exhibit 2 7 modification. 8 CHAIRMAN BOYER: Okay. We should have taken 9 appearances before we actually get into the nitty-gritty. Why don't we do that. Beginning with 10 11 you, Ms. Hogle. 12 MS. HOGLE: Okay. This is Yvonne Hogle. CHAIRMAN BOYER: For? 13 14 MS. HOGLE: For Rocky Mountain Power. 15 CHAIRMAN BOYER: Thank you. 16 Ms. Schmid? 17 MS. SCHMID: Patricia E. Schmid, with the 18 Attorney General's Office, Division of Public 19 Utilities. 20 CHAIRMAN BOYER: Thank you. 21 Mr. Proctor? 22 MR. PROCTOR: Paul Proctor, on behalf of the 23 Utah Office of Consumer Services. 24 CHAIRMAN BOYER: Thank you Mr. Proctor. 25 Mr. Dodge?

Г

4	
1	MR. DODGE: Gary Dodge, on behalf of UAE.
2	MR. REEDER: And I'm Bob Reeder, for a group
3	of industrial customers whose names appear as a part
4	of this record that are known as UIEC.
5	CHAIRMAN BOYER: Thank you, Mr. Reeder.
6	MS. HAYES: Sophie Hayes for Utah Clean
7	Energy. And although we intervened, we have taken
8	Utah Clean Energy has taken no position on this
9	stipulation.
10	CHAIRMAN BOYER: Okay. Thank you, Ms. Hayes.
11	All right. Let's hear now from Mr. Taylor
12	regarding Exhibit 2 to the stipulation.
13	MR. TAYLOR: Do I need to be sworn first?
14	CHAIRMAN BOYER: Yes, you do.
15	(Mr. Taylor was sworn.)
16	CHAIRMAN BOYER: Thank you. Please be
17	seated.
18	MR. TAYLOR: Yes. What we're proposing is
19	that Exhibit 2 that was attached with the stipulation
20	that was filed last week be replaced with a Revised
21	Exhibit 2. This simplifies the rate design and the
22	tariff sheets that will be provided to customers. And
23	will simplify the bills that customers get as a result
24	of the three rate changes that are coming out of this
25	docket.

1	Exhibit 2 carried those rate changes all the
2	way out to cents per kilowatt hour or dollars per kW
3	charges. And since there are multiple kilowatt hour
4	charges and kW charges on customers' bills and there
5	are three different rate changes there could be as
6	many as 9 or 12 line items on an individual customer's
7	bill as a result of these changes.
8	This simplifies it down to only three line
9	items, while producing the same bills for customers.
10	So all parties involved think this is an improvement
11	and a simplification, without any change to the net
12	impact to customers.
13	CHAIRMAN BOYER: Thank you, Mr. Taylor.
14	Do we have a motion, Ms. Hogle?
15	MS. HOGLE: Yes, excuse me. Rocky Mountain
16	Power moves for the addendum to the settlement
17	agreement in Docket 10-035-89 be entered into the
18	record.
19	MR. REEDER: No objection.
20	MR. DODGE: No objection.
21	MS. SCHMID: No objection.
22	CHAIRMAN BOYER: Mr. Proctor?
23	MR. PROCTOR: No objection.
24	CHAIRMAN BOYER: Very well. Then the
25	Exhibit 2, the Amended Exhibit 2 will be admitted into
	0

1 evidence and substituted in the -- as an attachment to 2 the settlement stipulation. 3 (Exhibit No. 2 was admitted.) CHAIRMAN BOYER: And that brings us to the 4 5 direct testimony. It has been suggested that we admit 6 the -- all of the prefiled direct testimony in this 7 I guess we -- Mr. Dodge, do you want to make case. that motion? 8 9 MR. DODGE: I will make that motion. I move 10 that all of the prefiled direct testimony and exhibits 11 filed in this docket be admitted in the record without 12 the need to call the witnesses or cross ex -- and that 13 all parties waive cross examination. 14 CHAIRMAN BOYER: Are there any objections to 15 admitting the prefiled direct testimony, together with 16 exhibits? MS. SCHMID: No objection. 17 18 MS. HOGLE: No objection. 19 MR. REEDER: No objection. 20 MR. PROCTOR: Mr. Boyer, so long as there's 21 also a waiver of summaries. 22 MR. DODGE: And a waiver of summaries. CHAIRMAN BOYER: Together with a waiver of 23 24 summaries. 25 MR. PROCTOR: I would have no objection to

1 that. 2 CHAIRMAN BOYER: Very well. Any objection to 3 that? Okay. Very well then. The direct prefiled testimony, together with exhibits, are all admitted 4 5 into evidence without summaries. (All prefiled direct testimony and exhibits 6 7 were admitted.) 8 CHAIRMAN BOYER: And now let's hear from the 9 witnesses supporting our approval of the settlement 10 stipulation. Shall we start with the Company? 11 MS. HOGLE: Certainly. 17 DAVID L. TAYLOR, 13 called as a witness, having been duly sworn, 14 was examined and testified as follows: 15 DIRECT EXAMINATION 16 BY MS. HOGLE: 17 Mr. Taylor, can you please state your name 0. 18 and your position with Rocky Mountain Power for the 19 record? My name is David L. Taylor. I'm employed by 20 Α. 21 Rocky Mountain Power as the manager of regulatory 22 affairs for the State of Utah. And can you tell us what the purpose of your 23 Q. testimony is today? 24 25 I will briefly review the history of Α. Yeah. 10

Г

1	events that led up to the stipulation and the key
2	elements of the stipulation that's being presented
3	before the Commission today.
4	This stipulation was entered into by Rocky
5	Mountain Power, the Utah Division of Public Utilities,
6	the Office of Consumer Services, the UAE intervention
7	group, and the Utah Industrial Energy Consumers.
8	These five groups will be represented as "the parties"
9	as we discuss about the stipulation.
10	I'll also reconfirm Rocky Mountain Power's
11	support for the stipulation and our belief that the
12	stipulation is in the public interest.
13	Q. And can you recount the key events that led
14	to the agreement among the parties, please?
15	A. On August 3, 2010, Rocky Mountain Power filed
16	with the Commission an application in Docket 10-035-89
17	under the Major Plant Addition Statute. That
18	application requested alternative cost recovery for
19	major plant additions related to the Populus to Ben
20	Lomond transmission line and the Dunlap I wind
21	project. These are collectively referred to
22	throughout the stipulation as the "MPA II Projects."
23	The application also requested that rates
24	change on or about January 1, 2011, for the following
25	items: Number 1, a rate increase of approximately

1 \$38.99 million on an annual basis for the MPA II 2 Projects. 3 Also to change rates on January 1 for approximately \$30.8 million for the Ben Lomond to 4 5 Terminal transmission project and the Dave Johnson 6 Generation Unit 3 environmental improvement projects. 7 These are referred to as MPA I projects. And that is 8 consistent with the stipulation and Commission order 9 that was entered in Docket 10-035-13. 10 In addition, Rocky Mountain Power requested 11 to stop the deferral from the MPA I projects, which 12 has been occurring since July of 2010. And to begin 13 collecting approximately \$15.72 million associated 14 with the MPA I deferred balance. Again, that would 15 begin on January 1, 2011. 16 Parties other than the Company filed direct 17 testimony of ten witnesses on October 26, 2010. Each 18 of those parties proposed adjustments and raised 19 issues with the relief that was requested in the Rocky 20 Mountain Power application. 21 And over the last several weeks the parties 22 have met and engaged in settlement discussions. And 23 based upon those discussions the parties have agreed 24 to the terms and conditions that are set forth in the 25 stipulation that's presented before you today.

1 The stipulation was filed and signed --2 signed and filed with the Commission on November 29, 3 2010. And while not all parties who have been 4 involved in the case have signed the stipulation, 5 we're not aware of any party who opposes the 6 stipulation that's presented here today. 7 Q. Can you please describe the stipulation? 8 Α. Yes. Let me walk through the, the major 9 paragraphs of the stipulation and the terms that the 10 parties have agreed to. Beginning with paragraph 7, 11 which describes the revenue requirements. The parties 12 have agreed, for this case only, that the following 13 elements of this stipulation may apply just to this 14 case. 15 That the Commission should enter an order, 16 pursuant to the Major Plant Addition Statute, that approves the cost recovery of the MPA II Projects and 17 18 the MPA I projects as follows: 19 That Utah's share of the revenue requirement 20 associated with the MPA II Projects for prudently-21 incurred capital costs and other reasonably projected 22 costs, and savings, and benefits is \$33.29 million 23 annually. 24 Utah's share and how that number was arrived 25 is laid out in the table that's attached -- or

1 included in paragraph 7(c.) The table shows a number of small adjustments that align the revenue 2 3 requirement calculations with the Company's most 4 current projections of costs for those two projects, 5 and a small adjustment for wheeling expense associated 6 with the transmission line. 7 There's two items on that table that warrant 8 a more detailed explanation. There is an adjustment 9 for \$5.57 million associated with bonus depreciation. 10 Paragraph 7(d) gives an explanation of the changes in 11 tax law that brought that adjustment about and how it 12 impacts this case. 13 The stipulation only addresses how that bonus 14 depreciation legislation applies to the MPA II 15 Projects in this docket. 16 The other item that's noticeable there is 17 dealing with REC revenues. As you'll notice, there's 18 no adjustment on that table to the projection of REC 19 revenues that the Company included in its filing. 20 However, there's a provision in the stipulation that 21 I'll talk about later that allows for a true up of 22 whatever those revenues associated with the RECs coming from Dunlap I prove to be that will be trued up 23 24 to those actual amounts. 25 Moving on to the other paragraphs in the

1 stipulation. Paragraphs 8 through 12 were drafted 2 carefully so as not to presume any outcome or 3 influence the Commission's decision in any way in any 4 open dockets that are currently sitting before the 5 Commission. They're designed specifically just to 6 address issues that are within the stipulation. 7 And that probably, that probably consumed the 8 bulk of the negotiations in the drafting of the 9 stipulation. To make sure that we could reach these 10 agreements without giving any presumption or influence 11 to the decisions that are pending before the 12 Commission in other dockets.

But in paragraph 8 the parties agree that on January 1, 2011, that Utah's share of REC revenues that's included in base rates from the last general rate case is \$9.9 million. Now, that amount does not include the \$0.76 million associated with REC revenues coming from the Dunlap I project that will separately be included in the rates from the MPA II docket.

So combining those two amounts is \$10.66 million of REC revenues that will be included in rates that, that the customers are now paying. And they will be con -- as of January 1, 2011, the amount in excess -- the REC revenues in excess of that amount will continue to be deferred in the REC balancing

1 account that was established in Docket 10-035-14. 2 And I'll explain a little more about the 3 treatment of that deferral as I discuss paragraphs 9 4 through 12. 5 In paragraph 9 the parties agree that the 6 \$3 million monthly customer sur-credit, as will be 7 reflected in Schedule 98 we'll discuss later, should 8 be established beginning January 1, 2011. This amount 9 represents incremental REC revenues not currently 10 reflected in base rates as of that time. 11 Schedule 98 is designed to achieve 12 approximately \$3 million a month in a sur-credit on an 13 average monthly basis, but the actual amount will vary 14 based upon customer usage from month to month. The 15 actual amount of the sur-credit that will be realized 16 by customers will be booked against the deferred REC 17 balance that was established in the docket I just 18 addressed. 19 This \$3 million a month sur-credit is to be 20 applied towards the final resolution of the REC 21 revenue deferrals, whatever that resolution turns out 22 to be. It's not intended to make any presumption as 23 to what the final resolution of it will be that this 24 Commission will make in the future. 25 As directed by future Commission order, the

Schedule 98 might be modified. It could be continued,
 it could be discontinued, or it could be adjusted in
 any way to reflect what that final Commission order
 turns out to be.

5 But absent any specific action on 6 Schedule 98, that schedule will terminate upon the 7 effective rate date that new rates are set in the next 8 Rocky Mountain Power general rate case. Subject to 9 any specific conditions that are discussed later in 10 the stipulation.

Paragraph 10. Then in light of the
stipulation, UAE withdraws its request that the
Commission determine, in this docket, the appropriate
ratemaking treatment of any balance in the deferred
REC balancing account.

16 Also, the stipulation renders moot the 17 Company's motion in this docket to strike portions of 18 UAE witness Kevin Higgins' testimony related to those 19 issues. The parties request that, number one, they be 20 excused from filing responses to that motion. And 21 two, that the Commission take no action on the motion. 22 The parties, however, agree that no party is

23 conceding any position or argument with respect to the
24 issues raised in that motion or in anything else.
25 Going on to paragraph 11. The parties also

agree that the final disposition and ratemaking
 treatment of any balance in the deferred REC balancing
 account should be resolved in another appropriate
 docket.

5 The parties don't agree as to what the 6 appropriate docket is, but the parties do support a 7 prompt resolution of that issue. One or more parties 8 may petition the Commission to request a resolution of 9 that docket at any time. And they're certainly not 10 precluded from that as a result of this stipulation.

Now, paragraph 12 only applies if the Commission determines in a future docket that all or any portion of the deferred REC balance should not be credited to customers. Including subject any portion of those, those REC revenues to a deadband or sharing band mechanism.

17 So in the case that the Commission decides 18 not all should be passed back, the balancing account 19 should be adjusted to reflect the Commission's 20 decision subject to one -- these following conditions: 21 First, the parties agree that projected REC 22 revenues associated with the Dunlap I project of the 23 0.76 million annually will be trued up to actual REC 24 revenues attributable to Dunlap. And that difference 25 will remain in the REC revenue for future treatment,

1	collection or return to customers.
2	Any carrying charge that's associated will
3	continue to apply to that amount. And a hundred
4	percent of that difference will be passed through to
5	customers, whether or not there are deadbands or
6	sharing bands that the Commission should adopt when it
7	makes that final resolution.
8	And that will continue until January from
9	January 1, 2011, until rates are set again in the next
10	Rocky Mountain Power general rate case.
11	One or more parties may petition that the
12	Commission, at that time, do a review of the
13	methodology associated with how the REC revenues with
14	Dunlap I were calculated, and how the amounts were
15	placed in the REC deferred account balance.
16	One or more parties might petition the
17	Commission for appropriate modifications to
18	Schedule 98 to implement the Commission's order. And
19	that could result in a collection of the balance from
20	ratepayers or a refund of that balance to ratepayers.
21	Moving on now to rate spread and rate design
22	associated with the stipulation in paragraph 13. The
23	parties agree that the 30.8 million stipulated net
24	revenue requirement from the MPA I docket, plus the
25	33.29 million stipulated revenue requirement from the
	10

1	MPA II docket, for a total of \$64.1 million on an
2	annual basis, will be spread among customer classes as
3	shown in Exhibit 1 attached to the stipulation. And
4	collected through the revised through collected
5	through Schedule 40 that's reflected as the prices
6	shown in the Revised Exhibit 2 that was presented to
7	the Commission this morning.
8	Schedule 40 will begin on January 1, 2011.
9	It will terminate on the effective date of rates in
10	the next general rate case of Rocky Mountain Power
11	that incorporates the projects from MPA I and MPA II
12	into that rate into those rates.
13	Now, there's a true up provision in the
14	stipulation as well related to schedule 40. The
15	actual Schedule 40 rates that have been billed and
16	collected from customers will be compared to
17	\$5.3 million per month. And that's just the revenue
18	requirement divided by 12, times the number of months
19	or fractions of months that Schedule 40 has been in
20	effect.
21	Any over-collection will be refunded to
22	customers. Any under-collection of that amount will
23	be collected from customers through a sur-credit or
24	surcharge in a subsequent month or months. Now, this
25	true up applies only to this case.

1	The Company was agreeable to that in this
2	case only because of the short period of time between
3	when these rates will go into effect and rates from
4	the next general rate case will most likely go into
5	effect.
6	Moving on to paragraph 14. The parties agree
7	that the \$3 million monthly sur-credit will be spread
8	to customer classes as shown in Exhibit 1. And
9	credited to customers through a new Schedule 98, as
10	reflected in the prices in the Revised Exhibit 2.
11	Moving on to paragraph 15. The deferred
12	revenue requirement from the MPA docket of the
13	\$15.72 million that's the amount that's been
14	deferred from July of 2010 through December of 2010
15	it will be collected beginning January 1, 2011, over a
16	period of approximately eight months.
17	It will be spread to customers according
18	to as laid out in Exhibit 1. And collected through
19	Schedule 97, with the prices shown in the Revised
20	Exhibit 2. Schedule 97 will terminate when the
21	deferred revenue from the MPA I docket plus carrying
22	charges has been collected from customers. It's
23	designed to collect exactly that amount of money.
24	Going on to paragraph 16. Paragraph 16 lays
25	out the net the base net power costs that would be
	ר 1

1 reflected in customers' rates at \$994.21 million, or 2 \$17.07 a megawatt hour. That amount should be 3 approved and established by the Commission upon 4 approval of this stipulation. 5 And that will represent a reduction from the 6 base net power cost level that was established in the 7 last rate case, reflecting the net power cost savings 8 from these, these MPA I and II projects. 9 The value will serve as the basis in rates. 10 That will be compared against any, any ECAM adjustment 11 should the Commission approve that in a future docket. 12 And there's a table there in paragraph 16 that shows 13 the monthly calculation of net power costs. That 14 could be compared to actual net power costs as they 15 occur. 16 Paragraph 17 is -- spells out clearly that 17 unless it's specifically resolved or required by this 18 stipulation the stipulation does not waive, or 19 compromise, or limit any argument or position that the 20 parties have relating to matters that are -- have 21 previously been determined, are currently pending 22 before, or that may be filed with this Commission. This doesn't limit the parties' arguments, or 23 24 positions, or rights in any of those dockets in any 25 way.

1	Specifically, the stipulation does not
2	resolve any of the disputed issues that are currently
3	before this Commission in the Dockets 09-035-15, which
4	is the ECAM docket, and 10-035-14, which is the REC
5	deferral docket.
6	And paragraph 18. The parties agree that the
7	\$33.29 million reflects Utah's share of the projected
8	net revenue requirement impact of those MPA II
9	Projects, including prudently-incurred capital costs
10	and other reasonably-projected cost savings and
11	benefits.
12	While agreeing to that, the parties also
13	agree that this does not preclude any party from
14	advocating in a future proceeding that the share of
15	cost that should be paid by Utah ratepayers for the
16	MPA II Projects should be different.
17	Furthermore, the parties agree that all
18	discovery in the MPA II docket relating to Populus to
19	Ben Lomond transmission line may be used and relied on
20	in a future proceeding without requesting that
21	those data requests again.
22	Paragraph 20, as in most stipulations, the
23	parties have agreed to this stipulation as an
24	aggregate package. Not all parties agree that each
25	aspect of adjustment is warranted or supportable in
	23

1 isolation of the others. 2 And the parties agree that the rate change 3 proposed by this stipulation is just reasonable, and results in an end result that's in the public 4 5 interest. The remaining paragraphs of the stipulation 6 7 just contain the general terms and conditions which 8 are associated with most stipulations presented before 9 this Commission. They represent the obligations of 10 the parties both to the stipulation and to each other. 11 0. Do you have any final comments on the Major 12 Plant Addition II stipulation? 13 First of all, I want to thank the Α. Yeah. 14 parties for working together to reach an agreement 15 that works for all parties. I restate the Company's 16 support of the stipulation. It was negotiated in good 17 faith by the parties to the stipulation. 18 And I believe this stipulation is in the 19 public interest. And I recommend that the Commission 20 approve the stipulation as filed. And that concludes 21 my comments, thank you. 22 CHAIRMAN BOYER: Thank you, Mr. Taylor. Are there parties who wish to cross examine Mr. Taylor? 23 I 24 suspect not. 25 The Commission is gonna reserve questions

until we've heard from all of the witnesses supporting 1 2 the stipulation. So let's turn now to the Division. 3 MS. SCHMID: Thank you. The Division's witness in support of the stipulation is Dr. William 4 5 Powell. Could Dr. Powell please be sworn? CHAIRMAN BOYER: Yes. Please stand, 6 7 Mr. Powell -- Dr. Powell. 8 (Dr. Powell was sworn.) 9 CHAIRMAN BOYER: Thank you. Please be 10 seated, Dr. Powell. 11 WILLIAM POWELL, Ph.D., 17 called as a witness, having been duly sworn, 13 was examined and testified as follows: 14 DIRECT EXAMINATION 15 BY MS. SCHMID: 16 Q. Could you please state your full name and 17 your employer for the record? 18 Α. My name is William Powell. Most people know me as "Artie," A-r-t-i-e. Is -- can you hear? 19 CHAIRMAN BOYER: Yes. 20 21 THE WITNESS: Okay. I'm the manager of the 22 energy section for the Division of Public Utilities. 23 (By Ms. Schmid) Have you been involved on Q. 74 behalf of the Division in this docket? 25 Yes, I have. Α.

Г

1	Q. What is the purpose of your testimony today?
2	A. The purpose of my testimony is to support the
3	stipulation as presented.
4	Q. Do you have a statement that you would like
5	to present?
6	A. Yes, I do.
7	Q. Please proceed.
8	A. Okay. Good morning Commissioners. The
9	Company has gone through the stipulation in quite a
10	bit of detail, so I won't go back through each of the
11	paragraphs. But I would like to point out just a
12	couple of features of this stipulation that are key to
13	the Division's support, and then make a general
14	statement in support of the stipulation.
15	Mr. Taylor for the Company went through the
16	REC revenue and the treatment of REC revenues as far
17	as the stipulation is concerned. There's a \$3 million
18	credit that will be credited to customers starting in
19	January. This credit is based on what the most-
20	current estimates are for the REC revenues that will
21	be or that will come into effect in the 2011 time
22	frame.
23	Also along with that Mr. Taylor pointed out
24	that the Dunlap REC revenues will be trued up. And
25	are not subject to any sharing, or deadbands, or
	76

1 anything like that that might come about out of the 2 deferred REC revenue docket. 3 The primary purpose for this was that there 4 were three proposals in direct testimony on how to 5 treat the incremental REC revenues associated with 6 Dunlap. And the stipulation represents, in the 7 Division's view, a fair or a reasonable compromise 8 between those three positions. That -- those can be 9 found in paragraphs 9 and 12. 10 Also, as Mr. Taylor pointed out, customers or 11 ratepayers are getting the benefit of bonus 12 depreciation as it was described in paragraph 7(d.) 13 The law was signed, if I remember correctly, on 14 September 27th. So it was after the Company's filing 15 of the application would have been the Division's 16 position in rebuttal testimony, and so we think this 17 is a key feature of the stipulation. 18 Mr. Taylor also described the rate spread, 19 and the amendment on the rate spread and rate design 20 that was presented this morning. And the Division has 21 reviewed that rate spread as -- and believes, again, 22 that that's a reasonable way to spread the costs in 23 this case. 24 Let me just state that the Division has 25 independently reviewed the numbers and calculations

1 that underlie all the values that you can see or 2 Mr. Taylor talked about this morning in the 3 stipulation. In particular, Division auditors have 4 reviewed and agree with the Company's bonus 5 depreciation calculations. 6 Additionally, Division analysts reviewed the 7 REC revenue, MPA I deferred amount of \$15.7 million, 8 and the rate spread and rate design, and agree with 9 the values as depicted in the stipulation. Finally, 10 Division analysts have reviewed and the Division 11 supports the rate design contained in the stipulation 12 as it was amended this morning. 13 Using the percentage increases as depicted in 14 Amended Exhibit 2 avoids unnecessary complexity, as 15 Mr. Taylor described. And the Division supports the 16 stipulation as being a reasonable compromise of the 17 issues raised in this case. 18 The stipulation allows for timely recovery of 19 the costs associated with the major plant additions 20 from MPA I and MPA II, but also recognizes offsetting 21 REC revenues not currently reflected in rates. 22 Starting in January ratepayers will receive 23 the benefits from the increase in REC revenues -- in this case a \$3 million monthly credit -- and the 24 25 benefits arising from the extension of the bonus

1 depreciation allowance. 2 Additionally, as part of its review in this 3 case the Division's consultants reviewed the net power 4 cost values and models as filed by the Company, and 5 found them to be consistent with prior Commission 6 orders and reasonable as a base net power cost amount 7 going forward starting in January. 8 Thus, the Division believes the stipulation 9 is in the public interest, and recommends that the 10 Commission adopt the stipulation as presented this 11 morning. And that concludes my summary remarks at 17 this time. 13 MS. SCHMID: Thank you. 14 CHAIRMAN BOYER: Thank you, Dr. Powell. 15 Does anyone wish to cross examine Dr. Powell? 16 Mr. Proctor, do you have a witness Okay. 17 supporting the stipulation? 18 MR. PROCTOR: Ms. Beck is the witness. 19 CHAIRMAN BOYER: Ms. Beck, would you please 20 rise and raise your right hand? 21 (Ms. Beck was sworn.) 22 MS. BECK: Good morning. My name is Michele 23 Beck. I'm the director of the Office of Consumer Services. The Office has participated fully in both 24 25 major plant filings that have led to the rate increase

requested to be implemented January 1, 2011.

The Office utilized both internal and outside expertise to review the reasonableness of the costs associated with the major plant additions, the impact on net power costs, the calculation of bonus depreciation, and the spread of these costs to the various customer classes.

Based on its analysis, the Office believes
the settlement presented to the Commission today will
result in just and reasonable rates for the
residential and small commercial customers whose
interests we represent.

The Office would also like to note just a couple of specific provisions that are critical for arriving at just and reasonable rates. The true-up type mechanism being implemented ensures that the Company will not over-collect for these new resources, and is in lieu of updating the billing determinants.

Also, the process for trueing up REC revenues associated with the new Dunlap wind plant provides protection that customers will be appropriately credited for these revenues. Something that had earlier been one of the Office's largest adjustments and greatest concerns.

25

1

I also note that the Office supports the

1	Revised Exhibit 2, in which new rates are based on an
2	equal-percent increase applied to the demand in energy
3	charges for each rate schedule, instead of a separate
4	price for each demand in energy billing component.
5	This results in the same impact on customers' monthly
6	bills as what was originally submitted, with the
7	benefit of fewer line item changes on the bills.
8	Given the rate protections that are included
9	in this agreement, the Office recommends Commission
10	approval.
11	CHAIRMAN BOYER: Thank you Ms. Beck.
12	Does anyone wish to cross examine Ms. Beck?
13	Thank you, Ms. Beck.
14	Mr. Dodge, have you a witness supporting the?
15	MR. DODGE: We do, Mr. Chairman, thank you.
16	Kevin Higgins is here to make a brief to offer
17	brief testimony on behalf of UAE.
18	CHAIRMAN BOYER: Thank you.
19	MR. DODGE: He'll need to be sworn.
20	(Mr. Higgins was sworn.)
21	CHAIRMAN BOYER: Thank you.
22	MR. DODGE: Please proceed.
23	MR. HIGGINS: Thank you. Good morning. UAE
24	fully supports the settlement agreement. I believe
25	it's a fair deal. I believe it's a good deal, in
	21

1 light of the facts.

The -- in my direct testimony in this case I had raised five substantive issues with respect to the Company's MPA II filing. And I believe the settlement agreement adequately addresses each of those five issues, either by preserving the issue to be addressed at a future time or by dealing it with -- dealing with it directly in the terms of the agreement.

9 I would like to simply mention two of those 10 issues right now and explain why UAE believes this is 11 a, a fair resolution. One issue I had raised in my 12 direct testimony pertained to recognizing the 13 incremental REC revenues in rates at this time to 14 mitigate the rate impact from the MPA II revenues. Or 15 revenue requirement.

In my direct testimony in this proceeding I had focused on the 2010 REC revenues, or incremental REC revenues, but recognized that there would be additional incremental REC revenues that should accrue to customers in 2011.

I believe the settlement addresses the merits of mitigating the rate impact through REC revenues by recognizing \$3 million per month of 2010 REC revenues, while not presuming any ultimate outcome that the Commission may reach with respect to the appropriate

1 treatment of REC revenues. 2 At least in the meantime there will be a 3 mitigation for customers with respect to those 2011 incremental REC revenues. And in the meantime, the 4 5 issues that have been raised with respect to 2010 are 6 preserved to be addressed at a future time. 7 Or actually the, the issues with respect to 8 all incremental REC revenues are preserved to be 9 addressed in another docket. 10 A second issue that I had raised that I 11 believe the settlement addresses fairly was the issue 12 of the appropriate billing determinants, which was 13 mentioned by Ms. Beck a moment ago. 14 The settlement addresses that issue because 15 it essentially sets a monthly revenue requirement 16 target. And will provide for the ultimate true up for the appropriate revenue amount, irrespective of which 17 18 billing determinants are used to recover those 19 revenues in the intervening months. 20 And so because it, in essence, adopts a true 21 up to ensure correct collection of the target revenue 22 requirement, I believe that is a creative and fair resolution of that issue. So with that, I conclude my 23 24 summary in support of adopting the settlement 25 agreement.

1 CHAIRMAN BOYER: Thank you, Mr. Higgins. 2 Does anyone wish to cross examine 3 Mr. Higgins? 4 Okay, thank you. 5 Mr. Reeder, have you had a witness supporting 6 the stipulation? 7 MR. REEDER: I do not. I would simply note 8 that we signed the stipulation and we support the 9 stipulation, including Exhibit No. 2. 10 Critical to our support are three paragraphs: 11 17, 19, and 26, as outlined by Mr. Taylor. That 12 testimony be admitted. That testimony can be used in subsequent proceedings. And the broad non-priority. 13 14 Thank you. 15 CHAIRMAN BOYER: Thank you, Mr. Reeder. 16 And Ms. Hayes, you've already indicated that 17 you do not have a witness here today. 18 And I don't see any other parties in the 19 hearing room, so let's hear -- see if the 20 Commissioners have any questions. 21 Commissioner Allen? 22 COMMISSIONER ALLEN: Thank you. Perhaps 23 Mr. Taylor can answer a question I have about this 24 bonus depreciation. That was an extension of an 25 existing bonus depreciation, correct? Was it already

Γ

1	in place during earlier in the year? Do you know?
2	MR. TAYLOR: It was until that was
3	extended it had not been applied to any investment
4	made in 2010.
5	COMMISSIONER ALLEN: Okay. So if it applies
6	to MPA I II but not I, is it because there was an
7	install date or there was a cap that you hit? How
8	wouldn't that have affected MPA I, or what have we
9	already seen that, or did did it just not affect
10	the deferral account?
11	MR. TAYLOR: Well, I'm gonna be over the tips
12	of my skis here a bit. But the bonus depreciation
13	will affect the deferment deferred income taxes on
14	a going-forward basis. It will apply to those assets
15	associated with MPA I as they're included in the base
16	rates in the next general rate case.
17	The adjustment here only applies to the
18	projects in MPA II.
19	COMMISSIONER ALLEN: Okay. And just for my
20	own curiosity, are we gonna see this extended into
21	2011? Is this still gonna be an issue before us, or
22	does it have a sunset date?
23	MR. TAYLOR: Now you've gone even beyond me.
24	COMMISSIONER ALLEN: Maybe some other party.
25	Anyone who has their accounting hat on? I'm just
	35

curious. 1

-	
2	DR. POWELL: Well, I certainly don't have an
3	accounting hat, but my understanding is consistent
4	with what Mr. Taylor was just describing. This was a
5	law that was in effect in 2009, but expired. And then
6	throughout the year this year, 2010, I guess there
7	was some debate in Congress about extending that.
8	And finally around September 27th the law was
9	signed so that bonus depreciation applied to assets
10	for 2010. So that it, it was not in effect when we
11	went through MPA I. It, it was signed after the
12	Company filed its testimony in this case, MPA II. And
13	then it's being reflected in the stipulation only as
14	it applies to the MPA II Projects.
15	Now, the Division has been meeting with the
16	Company. And we're trying to determine what the
17	impact of the bonus depreciation as it might apply to
18	any assets for 2010 and what the appropriate
19	ratemaking treatment will be for that.
20	COMMISSIONER ALLEN: You just answered my
21	next question, thank you.
22	DR. POWELL: Okay.
23	MR. TAYLOR: Commissioner Allen, if I may?
24	COMMISSIONER ALLEN: Yes.
25	MR. TAYLOR: To continue beyond 2010 would
	36

1 take additional congressional action. 2 COMMISSIONER ALLEN: Oh, okay. 3 MR. TAYLOR: So as it sits now it just 4 applies to assets going into service in 2010. 5 COMMISSIONER ALLEN: That's helpful, thank 6 you. 7 CHAIRMAN BOYER: Commissioner Campbell? COMMISSIONER CAMPBELL: First of all just let 8 9 me commend the parties for coming to agreement on 10 this. Let me also say that I think the explanations 11 were very thorough. So my questions are actually more 12 tangential, since we have you under oath and I have 13 chance to just ask. 14 Since these rates are effective January 1, I 15 got in this morning and read a couple memos from the 16 Division and the Committee as it relates to the DSM 17 tariff rider and suggestions about rate changes on 18 January 1. 19 Has the Company come to a conclusion or 20 position on whether they intend to change rates as it 21 relates to the DSM tariff rider as well on 22 January 1st? MR. TAYLOR: I know that we are planning to 23 24 file for a change in rates in the next -- this week or 25 next week. I'm not certain what effective date we're

1 gonna request. Generally we request at least a 30 --2 30 days from the time of that filing. But I know we 3 are planning to file for a change. COMMISSIONER CAMPBELL: And has this -- I 4 5 know this is a loose tie, since we're talking about a 6 transmission project. But has the Company done any 7 analysis -- are you aware that FERC has asked NERC to 8 change the definition of a bulk electric system from 9 200 down to a hundred kV? And has the Company done any analysis as far 10 11 as what that will do to cost allocation among the 12 states based on your transmission system? 13 MR. TAYLOR: I don't know the answer to the 14 first question. If, if they did change the 15 distinction so that some things that are currently 16 considered transmission lines become distribution 17 lines? That would have an impact on jurisdictional 18 allocations, yes. 19 COMMISSIONER CAMPBELL: Right. And I think 20 it actually goes the other way, where they would take 21 what we might consider distribution today and make 22 them transmission. 23 MR. TAYLOR: Well, today anything that's 24 46 kV and above is considered a transmission --25 COMMISSIONER CAMPBELL: Transmission in your

1 system.

T	system.
2	MR. REEDER: There's a distinction you may
3	want to draw with respect to that, though. In the
4	FERC order they had directed WECC and the other
5	regional entities to expand the definition of a bulk
6	electric system to a bright line. So it applies to
7	registration compliance, but not necessarily the
8	definition over transmission and jurisdictional rates.
9	I would expect it would be more in the
10	reliability rein that you would see the costs occur,
11	as the costs to comply with the NERC standards as
12	opposed to a lower level of voltage equipment. But I
13	would not expect it to affect the change in what is
14	the difference between transmission and distribution
15	as it exists in the Federal Power Act. They're two
16	different acts they're working under.
17	COMMISSIONER CAMPBELL: Thank you.
18	CHAIRMAN BOYER: Okay. Well, my questions
19	have been asked and answered. You will have noticed
20	that we had scheduled a public witness hearing for
21	11:30 today when the case was fully at issue. And we
22	determined last week not to cancel that, just on the
23	off chance that members of the public might have
24	comment on that.
25	So unless there is something further we need

Kelly L. Wilburn, CSR, RPR DepomaxMerit

(December 6, 2010 - RMP - 10-035-89) 1 to deal with at this moment, we'll recess until 11:30. 2 We'll reconvene then and let you know what we're gonna 3 do. MR. DODGE: Mr. Chairman, you won't mind if 4 5 some of us don't show up at 11:30? 6 CHAIRMAN BOYER: No, I won't mind. 7 MR. REEDER: Thank you. 8 CHAIRMAN BOYER: I wish you could extend me 9 the same courtesy. 10 MR. REEDER: Go ahead then. 11 CHAIRMAN BOYER: Thank you. 12 We'll be in recess, then, until 11:30. 13 (A recess was taken from 9:45 to 11:31 a.m.) 14 CHAIRMAN BOYER: This is the time and place 15 duly noticed for the hearing of testimony from public 16 witnesses in Docket 10-035-89. In the Matter of the 17 Application of Rocky Mountain Power For Alternative 18 Cost Recovery For Major Plant Additions of the Populus 19 to Ben Lomond Transmission Line and the Dunlap I Wind 20 Project. 21 And we are informed Ms. Murray of the Office of Consumer Services is here and kindly agreed to take 22 23 a role of all those witnesses wanting to give testimony, and it appears the list is blank. There's 24 25 no one here.

So, since there's no professors how long do we have to wait? All right. Well, no one has shown, and I expect that they won't show. So.

We have had an opportunity -- of course we've read the pleadings in the case, and we've analyzed the stipulation, and we've had an opportunity to discuss the stipulation with our colleagues on staff. And we have deliberated and determined to approve the stipulation as written.

10 We will prepare the order. Ordinarily we'd 11 ask one of the parties to prepare the order, but in 12 this case our expert and very aggressive staff has 13 pretty much worked out the order except for the 14 decision points and so we will be able to get this 15 order out very quickly. We understand the January 1 16 timeline, and so we'll bear that in mind as we work 17 through this.

And we want to compliment you on the good work that you've done, the cooperation you've manifest in reaching this stipulation. And the summaries this morning were very helpful to us.

22 So with that, we are adjourned. Thank you 23 all.

24

25

This is to certify that the foregoing proceedings were taken before me, KELLY L. WILBURN, a Certified Shorthand Reporter and Registered Professional Reporter in and for the State of Utah.

That the proceedings were reported by me in stenotype and thereafter caused by me to be transcribed into typewriting. And that a full, true, and correct transcription of said proceedings so taken and transcribed is set forth in the foregoing pages, numbered 1 through 41, inclusive.

I further certify that I am not of kin or otherwise associated with any of the parties to said cause of action, and that I am not interested in the event thereof.

SIGNED ON THIS **19th** DAY OF **December**, **2010**.

Kelly L. Wilburn, CSR, RPR Utah CSR No. 109582-7801
