
ELECTRIC SERVICE SCHEDULE NO. 111 - Continued

- Note 1. Available only to customers with electric water heat.
- Note 2. Available only to customers with permanently installed ducted electric furnaces, heat pumps or zonal electric heat systems serving at least 80% of the floor area and used as the primary heat source of the residence. Insulation must be fully installed prior to submitting application and incentive may not exceed project cost.
- Note 3. Customers with both electric heat and electric cooling are eligible for the incentives listed in the “Residences with Electric heat” section only.
- Note 4. Available only to customers with permanently installed mechanical (compressor based) central cooling equipment with duct systems serving at least 80% of the floor area. Insulation must be fully installed prior to submitting application and incentive may not exceed project cost.
- Note 5. An additional incentive of \$200/customer will be paid if two areas (any combination of attic, wall and floor) in the same residence are insulated in accordance with program specifications at the same time and are submitted on the same incentive application.
- Note 6. Final installed attic/ceiling insulation must be R-38 or greater.
- Note 7. Pre-existing attic/ceiling insulation must be R-20 or less.
- Note 8. Available only to customers with permanently installed mechanical (compressor based) central cooling equipment with duct systems serving at least 80% of the floor area.
- Note 9. Available only to customers with permanently installed ducted electric furnaces or heat pumps serving at least 80% of the floor area and used as the primary heat source of the residence.
- Note 10. Customers with electric heat and electric cooling are eligible for the incentive available for the electric heat incentive only.
- Note 11. Recycling incentives are only available for equipment being replaced with Qualifying Equipment eligible for an incentive through this program.
