Notes for Table 1a:

- 1 Incentives are capped at 50 percent of Energy Efficiency Project Costs and subject to the one-year payback cap.
- 2 2' U-tube lamps may be substituted for 4' linear fluorescent lamps in the above table.
- 3 For retrofits of existing equipment, lighting incentives will be paid on a one-for-one equipment replacement basis. If fixture counts are changing, the project will be considered under the approach for custom measures (see page 3).
- 4 Incentives for T8 Fluorescent Lamp Upgrades may not be combined with other fluorescent fixture incentives and will only be paid once per facility.
- 5 T8 HO/VHO and High Bay T-8 electronic ballasts are required to have a  $BF \leq 1.2$  to be eligible for incentives.
- 6 Lighting equipment listed only in the "Replace" column of Table 1a is not eligible for incentives.
- 7 To determine the length of LED channel letter signs, measure the length of individual letter at the centerline and add the individual values; do not measure the distance between letters.
- 8 Incentives for LED traffic light upgrades are not available.
