Hey Chuck,

Thanks for the detail. Please note that we will need this support to pay future invoices. There must be a problem with the meter at the grill and bar? There is no way we used this much power. The only thing running off the grill electrical is a small space heater for the pool at the lodge. I have asked Steve to remove the heater and we are going to remove the heater and we want the service to these two facilities terminated effective immediately.

What is your process for disputing usage charges due to a faulty meter? Also do you intend to distribute electrical service agreements? I have no record of anything being in place?

We appreciate your help in this matter.

Regards,

Jon C. McKay
