Re: Advice No. 11-08
Termination of Electric Service Schedule No. 97
Docket No. 10-035-13 Major Plant Addition I (MPA I)
Docket No. 10-035-89 Major Plant Addition II (MPA II)

The Commission's order in Docket No. 10-035-13 (MPA I Docket) approving the stipulated \$30.8 million annual revenue requirement for MPA I established a monthly deferral of \$2,566,667 effective July 1, 2010. On January 1, 2011, in compliance with the stipulation and Commission order in Docket No. 10-035-89 (MPA II Docket), accruals to the deferral stopped, and recovery of the \$15.7 million deferred balance began. Amortization and recovery of the deferral through Electric Service Schedule No. 97 was to occur over approximately eight months. Schedule No. 97 is to terminate when the deferred revenue from the MPA I Docket, plus carrying charges, has been collected from customers.

Attachment I shows the accruals, amortization (billing through Schedule 97) and monthly balances for the MPA deferral account. The balance not yet billed to customers as of August 31, 2011, is approximately \$1.2 million. With customer usage through early September 2011 but yet to be billed, it appears the account balance will be close to zero. As a result, the Company intends to apply Schedule 97 to customer usage through September 8, 2011, and terminate Schedule 97 on that date.

A final reconciliation of the deferral account will occur in October when meter readings and customer bills for all usage through September 8, 2011, are completed. Rocky Mountain Power proposes to refund or collect any over- or under-recovery of the MPA deferral account in a subsequent month(s). The Company also proposes to combine the true-up of the collections under Schedule 97 with the reconciliation and true-up of Schedule 40 addressed in Paragraph 15 of the MPAII Stipulation. Schedule 40 is scheduled to terminate September 21, 2011, when new rates from Docket No. 10-035-124 will go into effect.
