1 The 1 year simple payback cap means Energy Efficiency Incentives will not be available to reduce the simple payback of an Energy Efficiency Project below one year. If required, individual EEM Energy Efficiency Incentives will be adjusted downward pro-rata so the Energy Efficiency Project has a simple payback after incentives of one year or more.

2 EEM costs are subject to Company review and approval and Company may require additional documentation from the Customer or owner.

3 Two irrigation Energy Efficiency Measures have a measure cost cap. See the Irrigation incentive table for details.

4 The Network Personal Computer Power Management Software measure has a measure cost cap. See the Office incentive table for details.
