**Subject: Large Generator Interconnection Request
59.2 MW Latigo Wind Park Project**

Dear Mr. Fishback

We hereby formally request interconnection with PacifiCorp for a Large Generator Interconnection of 59.2 MW involving the Latigo Wind Park (the "Project"). This project is located about 2.5 miles NW of Monticello, UT in San Juan County. This is a wind generation project that will utilize 37 - GE XLE Wind Turbines that are rated 1.6 MW each. The proposed COD date is December 31, 2012.

There will be one interconnect point studied into the Pinto Substation at the 138kV bus shown on the attached project location drawing.

We would like to request that we skip the scoping meeting and Feasibility Study and begin with the System Impact Study.

Included with the enclosed Appendix 1 to LGIP - Interconnection Request for a Large Generating Facility Application are the following attachments:

Attachment A - This attachment include the Project maps.

Point of Interconnect Map

Project Location Map

Attachment B - Project Electrical Oneline Diagram, Drawing E1-1.

Attachment C - Appendix 1 of the LGIP

Attachment D - Evidence of site control (provided under separate cover due to large size)

In accordance with PacifiCorp's large generator interconnection application form, a check in the amount of \$10,000 to cover the pre-payment is also enclosed.
