Dear Public Service Commission,

I propose that any shortfall experienced by Rocky Mountain Power be charged against the dirtiest sources of electric power not the cleanest. Those of us who have taken a step to help clean up our environment by switching from coal-powered to home-installed solar power have done so not for the fun of it but to be good citizens. Everyone benefits from the fact that we are generating clean renewable electricity.

Please keep me informed on the opportunities for public comment on Docket 13-035-184.

and welcome to the 21st Century,

Mark and Kate Gardiner  
SLC, UT
