We are your neighbors. We are the people who wish you well at every possible occasion.

We are now asking you to do what you can to make *us* "well" - reject Rocky Mountain Power's (PaciCorp) on-going program to penalize those of us trying to invest in clean energy; i.e., solar generation.

The illogical of RMP's plan is the same as if I loaned you \$100 and you charged me 10% interest for the privilege.

Please consider US, not THEM.

Thank you.
