Dear Commissioners,

Thank you for your service.

We installed solar panels on our properties in Salt Lake City in an effort to help with air quality. I oppose Rocky Mountain Power's proposed fee increase of \$4.25 per month targeting customers with solar panels.

It appears to me that all customers should be assessed to be connected to the grid, pay for electricity they need, and be paid for any additional they supply to the grid. We need a model that encourages local generation of cleaner electricity.

Sincerely,

Don Gren
