## Proposed Solar Fee

1/10/2014

---

Paulette WELCH <pauletteot@aol.com>

To: psc@utah.gov

To Whom It May Concern,

Residential and commercial application of solar panels on roof tops benefits the community in general and helps toward more livable (breathable) communities in Utah.

I am opposed to the proposal for a solar fee applied to the customers personal investments in rooftop solar power. This proposal is an outrage to the progress toward clean air in Utah.

Community members who invest in solar panels should be rewarded not punished for their personal asses being directed toward reducing the overall need for the utilities to invest in additional polluting power plants. If there is less need for Rocky Mountain Power to expand, this is a benefit to the air pollution in Utah.

Please do NOT approve this solar fee.

Sincerely,

Paulette We
