I am writing to protest the Rocky Mountain power increased fee on solar producers.

We went to great expense to install solar power at our home in Hoytsville, Utah. We now produce power that goes into the grid. We are able to bank what we don't use but then at the end of March our bank is emptied and Rocky Mountain power gets the residual to resell and we lose. They make money on what we generated. We are creating the highest amount of power at the time of day when electricity usage is high. We are helping the planet. I feel Rocky Mountain power should be promoting clean energy and supporting it.

Please do not allow them to raise our monthly rate.

many thanks,

Gaye Stoner
