Subject: Don't Stop Environmentally Friendly Progress!
To: tleva@utah.gov

Dear Commissioner LeVar,

Utah ranks 7th in the United States for solar resource but only 31st for solar homes. Utah should be a solar leader but we have fallen behind.

The world is coming to a crucial point in which our current methods of producing power cannot be maintained. Sunlight is abundant and belongs to no one.

People have to pay to have the solar panels installed, not RMP, so why do they get to profit off of them? If they want to profit, tell them to install their own solar panels and sell that energy.

Don't penalize customers for making the choice to generate their own clean energy. I urge you to support Utah's clean energy future and oppose this unfair tax.

Sincerely,

ERIKA BOTTOMS
