Attn: Warren Buffet – Chairman

Everyone,

I am disappointed to learn that Rocky Mountain Power is seeking to impose a monthly surcharge on rooftop solar generation here in Utah. What a shame – we have terrible pollution in the Salt Lake Valley and everyone, including the Commission, should be encouraging power generation with a low carbon footprint, such as solar.

Mr. Buffett and Rocky Mountain Power, you have a civic responsibility to the communities you serve. Working to discourage efforts to clean up the air in Salt Lake in the name of return to shareholders is not congruent with this responsibility. Please reconsider your position on this matter.

Sincerely,

Frederick P. McBrier
