Public Service Commission,

Do NOT tax rooftop solar in Utah!

Utah's largest utility -- Rocky Mountain Power -- has recently proposed a tax on solar power that would charge rooftop solar customers a new and unnecessary monthly fee. Taxing solar is unwarranted and will make it harder for Utah residents to generate their own energy and invest in solar energy.

If approved, Rocky Mountain Power's proposed solar tax would deter Utah's transition to more clean, local energy that benefits all ratepayers and creates local jobs. Rooftop solar customers help the utility avoid peak energy purchases and deliver locally generated electricity to their neighbors.

I would like a reply to this letter. Please respond to let me know your thoughts on this matter.
