	Hearing Proceedings 06/30/14	5
1	Hearing Proceedings	
2	June 30, 2014	
3	PROCEEDINGS	
4	COMMISSIONER CLARK: Good morning, ladies	
5	and gentlemen. Can you all hear me? I'm David Clark.	
6	We have someone on the phone, we'll have you	
7	identify yourselves in just a moment.	
8	I'm David Clark, one of the three commissioners.	
9	Next to me is Chairman Ron Allen, next to him is Commissioner	
10	Thad LeVar. I'm going to be acting as the hearing officer for	
11	our hearing today.	
12	This is the time and place duly noticed for a	
13	hearing in two dockets, first Docket No. 13-035-184, which is	
14	commonly referred to as Rocky Mountain Power's general rate	
15	case, and also Docket No. 13-035-196, which pertains to	
16	revisions to backup, maintenance, and supplementary power	
17	service tariff, electric service Schedule 31.	
18	We're going to take the stipulation pertaining to the	
19	general rate case up first, and then the stipulation and the other	
20	docket will follow. We want to begin by having parties enter	
21	their appearances, identify their witnesses as they do so. And	
22	we'll begin first with those who are physically present in the	
23	hearing room and then we'll have those on the phone, who	
24	intend to participate, identify themselves as well.	
25	And just so you're aware, after we have the counsel	

	Treating Proceedings 00/30/14
1	enter their appearances, we thought it might be useful to have a
2	brief discussion of the scope of the hearing that will be held
3	commencing July 28 so that any who are present and
4	participating for that purpose only can then go on with the other
5	business that they have before them today, and then we'll take
6	up the stipulations.
7	If there's an objection to that, please let me know
8	when you enter your appearances.
9	Let's begin with the applicant, Ms. Hogle.
10	MS. HOGLE: Thank you. Good morning,
11	Commissioners, Chairmen. My name is Yvonne Hogle,
12	representing Rocky Mountain Power. With me here today is Mr.
13	Dave Taylor, who will be presenting a summary of the
14	settlement stipulation. Also with me today is Steve McDougal,
15	who was a witness in the case, and he's available for any
16	questions that you may have. On the phone with us today, also,
17	are Joelle Stewart and Mr. Greg Duvall, for the same reasons.
18	COMMISSIONER CLARK: Thank you.
19	One preliminary item, Ms. Hogle, PacifiCorp had a
20	motion pending before the Commission. I'm assuming your
21	intent is to withdraw that; is that correct?
22	MS. HOGLE: Rocky Mountain Power's intent is to
23	request that the Commission not act on that motion, so that
24	would be our request. Thank you.
25	And there's also another preliminary matter. I don't

	Hearing Proceedings 06/30/14 7
1	know if you want to take that up right now or wait until
2	everybody introduces.
3	COMMISSIONER CLARK: Okay. Let's come back
4	to you as soon as we have all of the appearances. Thank you.
5	MS.HOGLE: Okay.
6	COMMISSIONER CLARK: Ms. Schmid?
7	MS. SCHMID: Good morning.
8	Patricia E. Schmid with the Attorney General's
9	Office, representing the Division of Public Utilities. And with
10	me, as the Division's witness, is Dr. William Artie Powell.
11	COMMISSIONER CLARK: Thank you.
12	MR. COLEMAN: Brent Coleman with the Attorney
13	General's Office, representing the Office of Consumer Services.
14	With me at counsel table is Michele Beck, the director of the
15	Office, who will provide the Office's position today.
16	COMMISSIONER CLARK: Thank you.
17	MR. JERRIGAN: Captain Jerrigan, representing the
18	Federal Executive Agencies. And attending by phone is Mr.
19	Meyers, our witness.
20	MR. DODGE: Gary Dodge on behalf of the UAE
21	Intervention Group and also on behalf of U.S. Magnesium, LLC.
22	Kevin Higgins is available in the audience as a witness if the
23	Commission has questions of him on the general rate case
24	stipulation.
25	MR. EVANS: William Evans for the Utah Industrial

1	Energy Consumers. And I apologize that I have let my witness
2	off this morning and don't have him available, but we can call
3	him on the phone. If you have questions, I think I might be able
4	to get him. We don't intend to offer any testimony from a
5	witness.
6	COMMISSIONER CLARK: Thanks, Mr. Evans.
7	Anyone else who's here with us in the room?
8	MR. MATTHEIS: Yes, sir. Mr. Commissioner, Peter
9	Mattheis on behalf of Nucor Steel. We don't have a witness in
10	the case. I'm just here as an observer today.
11	COMMISSIONER CLARK: Thank you, Mr. Mattheis.
12	Anyone else?
13	MS. HAYES: Sophie Hayes on behalf of Utah
14	Clean Energy.
15	COMMISSIONER CLARK: Thank you.
16	Anyone else?
17	Those on the phone, would you please, if you
18	intend to participate, identify yourselves and the party you
19	represent.
20	MR. DUVALL: This is Greg Duvall, director of Net
21	Power Costs, for the Company.
22	COMMISSIONER CLARK: Thank you.
23	MR. PLANK: This is Bruce Plank, I'm an attorney
24	appearing on behalf of TASC, The Alliance for Solar Choice.
25	MR. RITCHIE: This is Travis Ritchie, I'm an

25 COMMISSIONER CLARK: Okav. Thank vou.	24	MR. COLEMAN: I think I have the one that she
	25	COMMISSIONER CLARK: Okay. Thank you.

	Healing Proceedings 00/30/14
1	All right. We're going to continue, and it would
2	help if you'd spell your name as you identify yourselves. For
3	those who have already done that, we think we have the
4	spellings on other documents here in the hearing room and we'll
5	make sure we have them correct in the record.
6	So now back to those on the phone. Is there
7	anyone else who would like to identify themselves?
8	MR. MEYER: This is Greg Meyer, M-E-Y-E-R,
9	consultant for the FEA.
10	COMMISSIONER CLARK: Thank you.
11	Anyone else?
12	Thank you very much.
13	Ms. Hogle, you mentioned you had a preliminary
14	matter.
15	MS. HOGLE: Yes, Commissioner. I just wanted to
16	note that although the net metering issue in the cost-of-service
17	phase is not at issue here today, Rocky Mountain Power would
18	like to note that we, Rocky Mountain Power, were never served
19	with Mr. Michael Rossetti'srepresenting UCARE, his testimony
20	when it was due in June, I believe. And we noted that in the
21	testimony that we filed just recently and would like the
22	opportunity to respond to that testimony in surrebuttal on the
23	date that surrebuttal is due.
24	I contacted Mr. Rossetti, knowing that he is not
25	represented by counsel, he is representing UCARE on his

	Hearing Proceedings 06/30/14	11
1	behalf, and he indicated to me that that would be fine.	
2	COMMISSIONER CLARK: And as far as I'm aware,	
3	Mr. Rossetti isn't present today or on the phone; is that correct?	
4	Okay. Thank you, Ms. Hogle, for that	
5	representation. And on the basis of the representation, we'll	
6	permit the company to respond as you indicated.	
7	MS. HOGLE: Thank you.	
8	COMMISSIONER CLARK: I believe, assuming the	
9	stipulations that are before us are accepted and things go	
10	forward as the parties plan, then the one issue that will remain	
11	for hearing in the week of July 28 will be the net metering issue;	
12	is that correct? Is there any addition or correction to that	
13	statement that the party would like to make?	
14	That being the case, we note that the direct	
15	testimony of the parties has net metering testimony sort of	
16	commingled in it. And our thought would be, you've asked us to	
17	receive all of the testimony that's been provided or filed into	
18	evidence. And we would intend to do that today, but to receive	
19	all of the testimony and exhibits that pertain to the net metering	
20	issue provisionally, subject to any objections that might come	
21	before us in that hearing.	
22	Does any party have a comment on that process?	
23	MS. SCHMID: That's acceptable to the Division.	
24	COMMISSIONER CLARK: Okay. I'm going to	
25	assume it's acceptable to everyone else, given the silence that	

	Hearing Proceedings 06/30/14	12
1	l'm perceiving.	
2	Okay. Thank you.	
3	Next, is there anyone present or on the phone who	
4	intends to question witnesses that are going to offer testimony	
5	in support of the stipulation today or is there anyone who	
6	intends to offer testimony in opposition to the stipulations,	
7	either of them?	
8	That's as we expected. So what we would intend to	
9	do, then, is to hear the witnesses first for the general rate case	
10	stipulation as a panel. And we would have them make their	
11	individual statements in support of the stipulation, but then be	
12	subject to questions by the Commission as a panel.	
13	Is there any objection or comment on that process?	
14	Okay. Any other preliminary matters that we ought	
15	to take up before we swear the witnesses who are going to offer	
16	testimony in support of the stipulation?	
17	MR. PLANK: Commissioner Clark, this is Bruce	
18	Plank, attorney for TASC. I wanted to see if you would be	
19	inclined to determine the witness sequence for the net metering	
20	hearing, commencing on July 28, to allow for scheduling of	
21	out-of-town witnesses. Would you be inclined toI'm assuming	
22	the order would be Company, Division, Office, and then others.	
23	Is that the Commission's intention with the net	
24	metering phase of the hearing?	
25	COMMISSIONER CLARK: That would be our	

	Hearing Proceedings 06/30/14 13
1	typical practice and our intention, subject to an objection. And
2	if it would be helpful to the parties to identify the order beyond
3	that, we could attempt to do that now for a moment.
4	Is there any opposition to taking a moment to
5	consider order of witnesses for the hearing?
6	MR. COLEMAN: Mr. Commissioner, I think the
7	parties probably could work that technicality or that
8	administrative issue out amongst themselves. Not all the
9	parties to participate in the net metering portion of the case are
10	present, so I think it might be a little premature to try to address
11	groupings or order of presentations. So I think it might be more
12	efficient to allow the parties an opportunity, as a whole, to work
13	out the presentation order amongst themselves rather than here
14	today.
15	COMMISSIONER CLARK: Thank you, Mr. Coleman.
16	Why don't we at least conclude that it would be
17	Company, Division, and Office, and then the order beyond that
18	could we look to you, Mr. Coleman, and to the Office, generally,
19	to work with the parties and to assist them in achieving an order
20	that accommodates their need and desire not to have their
21	experts undulytheir time unduly taken up here?
22	MR. COLEMAN: Sure. I will be happy to
23	spearhead that issue.
24	COMMISSIONER CLARK: Thank you. That would
25	be very helpful.

	Hearing Proceedings 06/30/14 14
1	MR. PLANK: Thank you, Commissioner Clark.
2	That's certainly adequate for my witness, and I'd be happy to
3	work with Mr. Coleman and the other parties to get that
4	straightened out.
5	With that behind us, I would ask to be excused. My
6	client's not interested in participating in the remainder of the
7	hearing today.
8	COMMISSIONER CLARK: Thank you for being with
9	us for this opening segment.
10	So which parties intend to offer witnesses in
11	support of the stipulation?
12	We have Mr. Taylor.
13	MS. HOGLE: Yes.
14	COMMISSIONER CLARK: Dr. Powell.
15	MR. COLEMAN: The Office.
16	COMMISSIONER CLARK: Ms. Peck.
17	Anyone else?
18	Then would the three of you please raise your right
19	hand?
20	Do you solemnly swear that the testimony you are
21	about to give shall be the truth, the whole truth, and nothing but
22	the truth?
23	DR. POWELL: I do.
24	MS.BECK: Yes.
25	MR. TAYLOR: Yes.

	Hearing Proceedings 06/30/14
1	COMMISSIONER CLARK: Thank you. So in that
2	order of Mr. Taylor, Dr. Powell, and Ms. Beck, you can make any
3	summary statements you'd like to and then we'll have questions.
4	Ms. Hogle?
5	DAVID L. TAYLOR, called as a witness for and on
6	behalf of Rocky Mountain Power, being first duly sworn, was
7	examined and testified as follows:
8	EXAMINATION
9	BY-MS.HOGLE:
10	Q. Can you please state your name and position with
11	Rocky Mountain Power.
12	A. My name is David L. Taylor. I'm employed by
13	Rocky Mountain Power as the manager of regulatory affairs for
14	the State of Utah. My business address is 201 South Main,
15	Suite 2300, Salt Lake City, Utah, 84111.
16	Q. And what is the purpose of your testimony today?
17	A. I will briefly review the key elements that led up to
18	the stipulation, as well as the significant elements of the
19	stipulation itself. This was the stipulation in Docket No.
20	13-035-184, referred to more frequently as the 2014 general
21	rate case. Stipulation was entered into by eight signing parties.
22	I'll also reconfirm Rocky Mountain Power's support
23	of the stipulation and the Company's belief that the stipulation is
24	in the public interest.
25	Q. Please proceed with a history of the events that led

	Hearing Proceedings 06/30/14 16	6
1	to the stipulation.	
2	A. On January 3 of 2014, Rocky Mountain Power filed	
3	a general rate case requesting an increase of \$76.3 million.	
4	On January 22 of this year, the Commission issued	
5	a scheduling order setting the procedural schedule in three	
6	separate phases for cost of capital, revenue requirement, and	
7	cost of service, rate spread, and rate design issues.	
8	Since that date, Rocky Mountain Power and	
9	intervening parties have filed several rounds of testimony in the	
10	case. And over the course of this proceeding, Rocky Mountain	
11	Power filed testimony of 18 witnesses. That included over 2400	
12	pages of testimony and exhibits in support of its request. The	
13	13 intervening parties filed the testimony of 35 witnesses.	
14	In addition to 160 filing requirement responses that	
15	were provided with our application, the Company also responded	
16	to over 2400 data requests, as intervening parties prepared the	
17	responses to the Company's case.	
18	I point this out just to show that prior to entering	
19	into settlement discussions, the Company presented a	
20	significant amount of evidence in the case, that the parties in	
21	the case have thoroughly reviewed all of that evidence and	
22	made determinations upon that review.	
23	Over the last several weeks, the parties in the case	
24	have engaged in settlement discussions. And based upon those	
25	discussions, the parties have reached an agreement to the	

	Hearing Proceedings 06/30/14 17
1	terms and conditions that are set forth in the stipulation that's
2	being presented before the Commission today.
3	In reaching that stipulation, various parties
4	considered and relied upon a number of different factors and
5	considerations. Included in that was the evidence that the
6	Company provided with its rate case filing, our providing support
7	for a two-step rate increase. The parties considered the
8	in-service date of the Sigurd-Red Butte transmission line and
9	other timing considerations and other factors.
10	In reviewing each of these issues, individual parties
11	may have placed greater weight on different issues in getting
12	comfortable with the agreement. I will let those parties present
13	before you any of those issues with significance for them, if they
14	choose to do so.
15	The signed stipulation was filed with the
16	Commission on June 25 of this year. The settlement is intended
17	to resolve most of the issues in the general rate case, in
18	accordance with the respective terms and conditions as laid out
19	in the stipulation itself.
20	The stipulation does not, however, resolve the net
21	metering facilities charge that was proposed by the Company in
22	its direct filing. That issue is ongoing and will continue on the
23	schedule, as laid out by the Commission.
24	While not all parties in the case have signed the
25	stipulation, we're not aware of any party that opposes it. Most

	Hearing Proceedings 06/30/14	18
1	of the parties that have not signed the stipulation are those who	
2	continue to be involved in the net metering issues in that portion	
3	of the case.	
4	Q. Mr. Taylor, can you proceed with the key terms of	
5	the stipulation?	
6	A. Yes, I will. I'll walk through some of the key	
7	elements of the stipulation.	
8	I'm certain the Commission has read it, so I'll try to	
9	be brief as I touch on these terms. And in doing so, I don't	
10	intend to modify any of the terms of the stipulation in any way.	
11	And if, by chance, I misspeak the language of the stipulation,	
12	not the words that I say represent the combining agreement of	
13	the parties. And as I walk through, I'll trust you'll let me know if	
14	I'm giving you too much or not enough detail as we go forward.	
15	So the parties agree and recommend that the	
16	Commission approve the followingand we're now to about	
17	paragraph 18 of the stipulation. They agree that a multiyear	
18	rate plan be established. A multiyear rate plan will provide a	
19	measure of rate certainty for customers and it will also afford	
20	the Company a reasonable opportunity to earn and authorize a	
21	rate of return and recover its cost of service.	
22	With that, the multiyear plan includes the following	
23	components: Rocky Mountain Power should be permitted to	
24	implement a Step 1 general rate case in the amount of \$35	
25	million, to be effective September 1 of 2014. The parties have	

	Hearing Proceedings 06/30/14 19
1	agreed that the Sigurd-Red Butte transmission line investment is
2	prudent but cost recovery of that line will not begin until the
3	Step 2 rate change.
4	The Step 2 rate change: Rocky Mountain Power
5	should be permitted to implement a Step 2 rate increase in the
6	amount of 19.2 million. That will include the cost of the
7	Sigurd-Red Butte line and that increase will be effective on the
8	later of September 1, 2015, or the in-service date of the
9	Sigurd-Red Butte transmission line. If that transmission line is
10	not in service by September 1 of 2015, the Step 2 rate increase
11	will be delayed until the Sigurd-Red Butte line is placed in
12	service.
13	In paragraph 23, Rocky Mountain Power is allowed
14	to keep its currently effective 9.8 percent return on equity. The
15	cost of capital, both structure and the rates of equity and debt,
16	are shown in Table 1 of the stipulation. And that stipulated cost
17	to capital will be in force both through Step 1 and Step 2 of the
18	rate plan.
19	Moving on to paragraph 24, which discusses net
20	power costs, base net power cost in the amount of
21	\$1,495,800,000 annually on the total company basis or \$630
22	million annually on the Utah-allocated basis will become the
23	base net power cost, beginning on September 1 of 2014, in
24	effect during Step 1 of the rate plan.
25	Table 2, in the stipulation, shows the stipulated

	Hearing Proceedings 06/30/14 20
1	level of EBA costs. Now, those are both base net power costs
2	less wheeling revenue that's shown in dollars per megawatt hour
3	by month. And that will be the amounts used in the EBA
4	measurement throughout the Step 1.
5	Exhibit A to the stipulation provides the details of
6	that dollar per megawatt calculation for EBA cost. It shows,
7	also, how those EBA costs will be allocated among rate
8	schedules. And that's based on the composite NPC allocated,
9	which is also presented in Exhibit A.
10	The EBA cost allocated to special contracts,
11	whether or not they're included in these components in Exhibit
12	A, will be subject to the terms of those contracts. And the
13	monthly EBA costs shown in Table 2 will remain in place until
14	they are reestablished in the Step 2 rate change.
15	Base net power cost in the amount of
16	1,491,100,000 million annually on the total company basis, or
17	628 million annually on a Utah-allocated basis, will be
18	established for the base cost beginning September 1, 2015, or
19	concurrent with the Step 2 rate increase.
20	Those rates, as above, are shown in Table 3 below.
21	And Exhibit B to the stipulation contains the same information
22	as in Exhibit A, only as it relates to the Step 2 element of the
23	rate plan.
24	Moving on to paragraph 26, the parties request that
25	the Commission approve an extension of the current EBA pilot.

Hearing Proceedings	06/30/14
---------------------	----------

1 It's currently scheduled to end December 31, 2015. We 2 requested that be extended for one year, through December 31 3 of 2016. The parties also agree that the final report from the 4 Division of Public Utilities on the EBA pilot, which currently is 5 due within four months--the conclusion of the third year of the pilot, that that report be extended for one year as well, so that it 6 would be due within four months after the conclusion of the 7 8 fourth calendar year of the pilot.

9 The EBA findings will continue on their established
10 schedule, subject to this one-year extension as we've just
11 discussed.

Moving on to paragraph 27, effective November 1, 2014, all deferral balances currently being collected in the EBA over--there's three separate tranches with three separate amortization periods. Those amounts will be added together and they will be combined with the approved balance from the currently pending EBA adjustment. And that is in Docket No. 14-035-31.

19That total balance will be then collected over one20year, beginning November 1, 2014. The prior EBA balances will21continue to be collected without interest during the collection22period, but the Commission-approved balance from the pending23EBA docket, again Docket No. 14-035-31, will accrue interest24throughout the collection period, unless otherwise ordered by25the Commission or agreed to by stipulation in that docket.

Hearing Proceedings	06/30/14
---------------------	----------

	Hearing Proceedings 06/30/14 2	2.
1	In essence, what this means is we're going to	
2	greatly simplify the collection and amortization periods of all	
3	these EBA tranches into a one-year amortization beginning in	
4	November of this year.	
5	Moving on to a discussion of Naughton unit 3. For	
6	the purposes of the revenue requirement calculation in this	
7	case, Naughton unit 3 is assumed to continue to operate as a	
8	coal-fueled resource through December 31 of 2017.	
9	If the Company does not obtain the amended	
10	permit, as necessary, in 2014 to continue to operate on coal,	
11	the Company would be allowed to continue to operateif we	
12	don't get the permit that allows us to continue to operate	
13	Naughton as a coal-fired plant through December 17, the	
14	Company will be entitled to request. And the parties have	
15	agreed not to oppose a deferred accounting order for the	
16	revenue requirement impact of that event.	
17	The potential recovery from customers will be	
18	pursuant to a Commission order in the future rate case. And the	
19	parties may contest recovery of those costs, notwithstanding	
20	their agreement not to oppose the deferred accounting	
21	treatment.	
22	Moving on to a discussion of renewable energy	
23	credits, and this is paragraph 29, base REC revenue rates for	
24	the REC balancing account purposes will be set at \$2 million.	
25	That's a Utah-allocated number, effective with the September 1	

	Hearing Proceedings 06/30/14 23	3
1	rate increase, Step 1 rate increase on September 1 of 2014.	
2	They will continue at this level until they are set through a	
3	subsequent general rate case filing on or after January 1 of	
4	2016.	
5	The \$2 million base REC amount in base rate is net	
6	of the 10 percent incentive per paragraph 39 of the stipulation in	
7	Docket 11-035-200. And the REC balancing account mechanism	
8	will continue to operate on the normal schedule.	
9	Moving to a discussion of the energy imbalance	
10	market, this is now paragraph 30, the parties request the	
11	Commission enter a deferred accounting order to permit the	
12	Company to begin to defer Utah's allocated portion of energy	
13	imbalance market, or EIM, related operation and maintenance	
14	expenses incurred after September 1, 2014, and depreciation	
15	expense related to capital investments necessary to implement	
16	EIM recorded on or after September 1 of 2014.	
17	These will be dealt with for recovery in the future	
18	case pursuant to Commission order in that case. And, again,	
19	any EIM deferred costs should be determined in the future case.	
20	And the parties may contest recovery of those costs,	
21	notwithstanding the agreement not to oppose a deferred	
22	accounting of those issues now.	
23	Moving on to paragraph 31, the parties agree that	
24	any deferred EIM-related labor cost will be limited to positions	
25	that are exclusively created as a result of the Company's	

	Hearing Proceedings 06/30/14	24
1	participation in the energy imbalance market that are in excess	
2	of the full-time equivalent employees that are reflected in the	
3	Company's direct finding in this case.	
4	The next paragraph talks about the timing of the	
5	next rate case. The Company agrees that it will not file a	
6	general rate case or a major plant addition case or seek	
7	otherwise a rate increase in Utah prior to January 1, 2016, with	
8	an effective date prior to September 1 of 2016.	
9	The Step 2 increase in this docket and other	
10	commission-approved and currently existing rate adjustment	
11	mechanisms are exempt from that provision.	
12	Moving on to cost of service, rate spread, and rate	
13	design portion of the stipulation, paragraph 32 indicates that the	÷
14	Step 1 and Step 2 rate increases set forth above shall be	
15	allocated as set forth in Exhibit C and D to this stipulation.	
16	Exhibit C and D also include the monthly	
17	comparisons for Step 1 and Step 2 rate changes. Special	
18	contract rates are not established by this stipulation and will be	
19	governed by the terms of the applicable contract approved by	
20	the Commission.	
21	Moving on to paragraph 34, the residential	
22	customer charge should be increased to \$6 per month for	
23	single-phase residential customers and \$12 a month for	
24	three-phase residential customers until there is a change to the	
25	customer charge established by a Commission order.	

	Hearing Proceedings 06/30/14 25
1	The remainder of the revenue requirement
2	increases assigned to Schedules 1, 2 and 3 should be applied to
3	the Tier 2 winter rates for the residential class.
4	And in Step 2 of Schedule 1 rate, increase will also
5	be applied to Tier 2 winter rates.
6	Moving on to paragraph 35, the parties agree that
7	the residential minimum bill should be \$8 a month for
8	single-phase residential customers and \$16 a month for
9	three-phase residential customers.
10	Moving on to paragraph 36, as I have alluded to
11	earlier, no agreement was reached with regard to the net
12	metering facilities charge proposed by the Company in its
13	finding.
14	Exhibit D, that's provided with the stipulation,
15	shows the impact to residential rates designed under two
16	scenarios. The first scenario showing the residential rate
17	design, assuming that the Company's proposed net metering
18	facilities charge is adopted and put in place, and another
19	example showing the Utah residential rates, assuming that that
20	charge is excluded and not approved.
21	The parties agree that the outcome could be
22	different for either of these two scenarios after the net metering
23	phase of the case is completed, but the same process will
24	continue, that the residential rate will reflect whatever any
25	facility charge, if any, is adopted by the Commission in this

1	case.
2	As it relates to rate Schedule 6, a facilities charge
3	has been created for rate Schedule 6 and 6B. They've taken
4	the current power charge and separated that between a facilities
5	charge and a power charge.
6	The Step 1 revenue requirement increase for
7	Schedule 6 will be applied to both the power charge and the
8	facilities charge and the Step 2 revenue requirement increase
9	for Schedule 6 will be applied to the power charge only. And
10	those are also shown in Exhibit C to the stipulation.
11	Current, the EBA and RBA rates, which are
12	Schedules 94 and 98, as they apply to Schedule 6 and 6B, will
13	be recalculated so that the previously allocated and collective
14	amounts will be revised to collect those amounts based on the
15	new power charge only. So it will collect the same amount of
16	revenues but just be applied to a different element of the bill, so
17	that rate will be changed to accommodate that. That rate will
18	stay in place until new EBA and RBA rates are set.
19	And the compliance finding that Rocky Mountain
20	Power will make this case and this stipulation will reflect those
21	changes to the EBA rates for rate Schedule 6 at that time.
22	Speaking of Schedule 31, Exhibit C also reflects
23	the agreed-upon rates for Schedule 31 that were reached by the
24	parties in the stipulation in Docket 13-035-196 that will be
25	discussed later this morning.

1	Moving on to just some of the other items in the
2	stipulation. The parties agree to admit all of the prefiled
3	testimony into evidence and the parties also are very clear that
4	the admission of testimony into evidence does not represent an
5	agreement by the parties to any position taken in such
6	testimony.
7	Paragraph 39 states that the stay-out provision
8	discussed in paragraph 32 above will not prevent Rocky
9	Mountain Power from seeking deferred accounting orders for
10	costs related to the impacts of disposition through the sale,
11	closure, or other means of the Deer Creek Mine or mining
12	assets or the impact of the possible sale of the company's
13	ownership interest in the Craig and Hayden generating plants.
14	Again, an agreement to not oppose deferred
15	accounting does not represent any position by the companies to
16	be taken on those deferred accounting orders.
17	Paragraph 40 to 44 contain information about
18	certain pieces of information that the Company has agreed to
19	file with its next general rate case filing.
20	Moving on to the general terms and conditions of
21	the stipulation, the remaining paragraphs contain the general
22	terms and conditions which are associated with most
23	stipulations presented before the Commission, that they
24	represent the obligations of the party, both to the stipulation
25	and to each other as the stipulation is being processed and

	Hearing Proceedings 06/30/14	28
1	approved.	
2	Let me just point out a couple of items.	
3	As with most stipulations, this agreement was	
4	reached through negotiation and there's a fair amount of	
5	compromise from the parties in the final agreement. While all of	F
6	the parties agree to the rate increase and the resolutions of	
7	deferred accounting dockets, each party got there in a different	
8	way and they may have used different assumptions, different	
9	evaluations, and different adjustments. That's typical of many	
10	stipulations.	
11	And with that background, the parties agree that	
12	this stipulation as a whole is just and reasonable and in the	
13	public interest. The stipulation is an integrated whole and any	
14	party may withdraw from it if it's not approved without material	
15	change or condition by the Commission	
16	Q. Mr. Taylor, do you have any final comments?	
17	A. Yes. I want to thank the parties for working	
18	together to reach an agreement that works for all of the parties.	
19	As with most settlements, getting here took a lot of hard work	
20	from everybody involved, so I appreciate that.	
21	I want to restate the Company's support for the	
22	stipulation. It was negotiated in good faith by the parties and I	
23	believe the stipulation is in the public interest and I recommend	
24	that the Commission approve the stipulation as it was filed.	
25	And that concludes my comments. Thank you.	

		Hearing Proceedings 06/30/14	29
1		COMMISSIONER CLARK: Thank you, Mr. Taylor.	
2		Ms. Schmid?	
3		MS. SCHMID: Thank you.	
4		WILLIAM A. POWELL, called as a witness for and	
5	on behalf o	f the Division of Public Utilities, being first duly	
6	sworn, was	examined and testified as follows:	
7	EXAM	IINATION	
8	BY-M	S.SCHMID:	
9	Q.	Just a couple of preliminary questions.	
10		Dr. Powell, by whom are you employed and in what	
11	capacity?		
12	Α.	I'm employed by the Division of Public Utilities. I'm	n
13	a manager of the energy section.		
14	Q.	As manager of the energy section, did you	
15	participate	in this docket, including settlement?	
16	Α.	Yes, I did.	
17	Q.	Do you have a statement to provide concerning the	;
18	stipulation?		
19	Α.	Yes, a brief one.	
20	Q.	Please proceed.	
21	Α.	Good morning. Thank you for this opportunity and	
22	patience to	listen to us this morning.	
23		If I could draw your attention to paragraph 2, I'll be	
24	fairly brief in my comments.		
25		Mr. Taylor, for the Company, has gone through the	

	Treating Proceedings 00/30/14 30
1	stipulation in quite a bit of detail, but it says here in paragraph
2	2, the parties represent and this includes the Division, that
3	this stipulation is just and reasonable and resultset cetera, et
4	cetera, will result in rates that are just and reasonable. And the
5	Division recommends that the Commission adopt the stipulation
6	as being in the public interest as it's been filed.
7	I would like to just make a few comments on some
8	of the terms and conditions of the stipulation that led the
9	Division to agree and to sign the stipulation.
10	The Division believes that the compromises that
11	you see are the results and the stipulation are reasonable
12	compromises of the issues that were raised by various parties in
13	the case. Overall, we believe that the rates contained in the
14	stipulation are just and reasonable and in the public interest.
15	If we could set aside, for just a second, the return
16	on equity. The revenue requirement is approximatelyor at
17	least the Division believes that the revenue requirement that's
18	represented in the stipulation is approximately where our
19	surrebuttal position would have been. We did withdraw a couple
20	of our adjustments in our rebuttal testimony. And based on the
21	Company's testimonytheir rebuttal testimony, there were likely
22	other adjustments that we would have withdrawn on surrebuttal
23	testimony.
24	The cost thenI'll come back to the return on equity
25	in just a minute.

## Hearing Proceedings 06/30/14

1	The cost of service in the rate design, other than a
2	few issues that Mr. Taylor pointed out, are pretty much status
3	quo, which we think is a reasonable outcome in this particular
4	case. As the Commission is aware, there's ongoing discussions
5	at the state level on interjurisdictional allocations. Those are
6	scheduled to be concluded sometime in the next year, in 2015.
7	And we thought it would be premature, at this time,
8	to make any radical changes on the class cost of service with
9	the anticipation or with the possibility, I should say, that we
10	would have to make further changes at the next rate case based
11	on the outcome of those discussions at the state levels.
12	We did implement, in Schedule 6, as Mr. Taylor
13	pointed out, a facilities charge, which we reviewed the bill
14	impacts, which are included in the exhibits to the stipulation.
15	And we find those bill impacts are reasonable for that particular
16	class.
17	From the Division's point of view, if you look at the
18	rate spread, there was some movement to full cost of service by
19	some rate schedules. And we believe that this is a good
20	outcome of the stipulation.
21	Moving back to the rate of return for just a second,
22	it's possiblenot too mysterious or not too surprising, that the
23	Division, in isolation, would never have agreed to a 9.8 rate of
24	return in this particular case. However, we did evaluate some of
25	the other terms and conditions and believe that the 9.8 is

	Hearing Proceedings 06/30/14 32
1	well-balanced with the outcomes of those particular terms.
2	We calculated that if the Company were to file a
3	rate case, for example, in 2015, that there are approximately
4	\$21 million worth of capital additions. That's a revenue
5	requirement value that we know about today. These include the
6	Sigurd-Red Butte transmission line and other capital additions
7	that were in the rate casein this particular rate case for only
8	part of the test year. Obviously, there would have been other
9	capital additions in a 2015 rate case that the company would
10	have brought forward also.
11	We also note that the Company anticipates that the
12	Sigurd-Red Butte line will be completed and in service in June
13	of 2015, but yet, the stipulation delays the amortizationor the
14	collection of those revenue requirement costs until September
15	or when the line actually does come into place, whichever date
16	is later.
17	That would basically conclude my supporting
18	comments for the stipulation at this time.
19	COMMISSIONER CLARK: Thank you, Dr. Powell.
20	Mr. Coleman?
21	MR. COLEMAN: Thank you.
22	MICHELE BECK, called as a witness for and on
23	behalf of the Office of Consumer Services, being first duly
24	sworn, was examined and testified as follows:
25	EXAMINATION

	Hearing Proceedings 06/30/14 33
1	BY-MR.COLEMAN:
2	Q. Ms. Beck, will you please state your title for the
3	record?
4	A. I'm the director of the Office of Consumer Services.
5	Q. And as the director, I presume that you directed
6	and oversaw the preparation of testimony and participated in the
7	settlement on behalf of the office in this case?
8	A. Yes, I did.
9	Q. Do you have a position statement from the Office
10	about the stipulation?
11	A. Yes, I do.
12	The Office reviewed all aspects of this case and
13	submitted testimony of seven witnesses in the areas of cost of
14	capital, revenue requirement, net power costs, cost of service,
15	and residential rate design. The Office also participated in all
16	settlement discussions on behalf of the customers it represents,
17	specifically the residential schedules, irrigators taking service
18	under Schedule 10, and small commercial Schedule 23
19	customers.
20	My purpose today is to speak in favor of the
21	settlement before the Commission. I will first address the
22	revenue requirement increase.
23	The parties agreed upon an increase of \$35 million
24	to occur on September 1, 2014, if approved. The Office
25	believes that this \$35 million is a reasonable outcome for this

	Hearing Proceedings 06/30/14 34
1	case, given the evidence presented in this case in recent
2	relevant Commission orders.
3	Although the Office's initial position included a
4	negative revenue requirement, additional evidence became
5	known through testimony and discovery that allows us to support
6	the 35 million increase, which is, of course, substantially lower
7	than what the Company originally requested.
8	Next, I'd like to address the concept and specifics
9	of a two-step rate increase. The Office believes that any rate
10	increase coming from this case, or really any one case, must be
11	supported by evidence presented within that particular case.
12	The Step 2 rate increase here of 19.2 million scheduled for
13	September 1, 2015, is tied both in calculation and
14	implementation to the Sigurd-Red Butte transmission line and
15	the supporting evidence for which is included in this case at
16	hand.
17	The Office believes that it is in the public interest
18	to agree to the increase associated with this increase rather
19	than have the Company pursue a full general rate case next
20	year.
21	The Office supports the rate spread included in the
22	stipulation as representing a reasonable compromise among a
23	wide range of competing cost of service proposals. The office
24	notes that the settlement moves all customer classes in the
25	direction towards closer alignment with actual cost to service

	Hearing Proceedings 06/30/14	3
1	classes.	
2	The Office specifically focused its analysis on the	
3	residential irrigator and small commercial classes that it	
4	represents and testifies that the settlement results in just and	
5	reasonable rates for those customers.	
6	Finally, I'd like to speak in favor of the residential	
7	rate design. The Office asserts that the increase in customer	
8	charge by \$1 to \$6 for six single-phase customers and a	
9	corresponding increase to \$12 for three-phase customers is	
10	supported by the cost of service evidence put forward by the	
11	Office. The Office recommended and supports the remainder of	
12	the increase for the residential class being assigned to the	
13	second energy tier for winter rates.	
14	As we noted in a prior case where a second energy	
15	tier was first implemented for winter, the rate was deliberately	
16	set lower due to gradualism. The outcome of this case will bring	
17	the second tier winter rate much closer to the second tier	
18	summer rate.	
19	The Office is pleased with the residential rate	
20	design outcome and asserts the resulting price signal and bill	
21	impact to be fair, reasonable, and consistent with key rate	
22	principles.	
23	Of course, the Office notes that a key element to	
24	the residential rate design is left to be determined at next	
25	month's hearing.	

	Hearing Proceedings 06/30/14 3
1	Other important elements of the stipulation include
2	the Company's agreement regarding the timing of the filing and
3	PC updates and also the agreement to complete and file a
4	marginal cost study in the next general rate case.
5	In conclusion, in the Office's view, this settlement
6	is in the public interest and will result in just and reasonable
7	rates, thus we recommend Commission approval.
8	COMMISSIONER CLARK: Thank you, Ms. Beck.
9	Earlier, it was determined that there wouldn't be
10	any questions for the panel, except from the Commission, but if
11	the statements have altered any party's position on that, now is
12	the time to speak up.
13	And hearing no comment, we'll turn to the
14	Commission.
15	Any questions?
16	COMMISSIONER LEVAR: No.
17	COMMISSIONER CLARK: Okay. I have a couple
18	of questions. And I'm going to direct these to the panel at
19	large, but, Mr. Taylor, probably it would be efficient if you'd
20	begin the responses to these.
21	First, regarding paragraph 21, which addresses the
22	Sigurd-Red Butte transmission line investment, paragraph 21
23	states that this investment is prudent and that cost recovery will
24	occur in the Step 2 rate change.
25	That characterization, does that apply to the

	Hearing Proceedings 06/30/14 37
1	investment as it exists today, to the investment as it will exist at
2	the conclusion of construction? How do the parties interpret this
3	statement?
4	MR. TAYLOR: I believe that statement says that
5	the cost of the line, as they were presented in this case by
6	Rocky Mountain Power, which is a projection of what those
7	costs would be upon completion, that level of cost was found to
8	be prudent, but any cost recovery, that will not begin until Step
9	2.
10	COMMISSIONER CLARK: Is Mr. Taylor's
11	clarification there consistent with the understanding of the
12	Division and the Office?
13	DR. POWELL: Yes, it is, with the understanding, I
14	would add, to what Mr. Taylor has said, in our position that we
15	took in the CPC for the Sigurd-Red Butte section, we also had
16	Division analysts that reviewed the costs of the line in the rate
17	case and our consultant also reviewed those costs. And so we
18	agree with Mr. Taylor's characterization of those.
19	COMMISSIONER CLARK: Thank you.
20	Ms. Beck, anything to add?
21	MS. BECK: We agree as well.
22	COMMISSIONER CLARK: Thank you.
23	And in the event that the completion of construction
24	is delayed beyond September 1, 2015, is there a process for
25	informing the Commission and the parties as to the date of

	Hearing Proceedings 06/30/14 38
1	completion? Have you thought about that, Mr. Taylor?
2	MR. TAYLOR: I don't know that there was a formal
3	process laid out in the stipulation, but we will certainly inform all
4	the participants if, No. 1, we believe there is a delay and what
5	the anticipated in-service date is. We will also inform them the
6	date upon which it goes into service. I just will say, at this
7	point, we fully expect the line to be in service well before
8	September 1 of 2015.
9	COMMISSIONER CLARK: Okay. Thank you.
10	Now, inviting you to look at paragraph 27 for a
11	couple of moments, the dockets referred to in the first sentence,
12	which each pertain to a deferral balance, am I correct in
13	understanding that, absent this provision, the recovery of those
14	balances wouldn't have been achieved on or before November
15	1, 2014?
16	MR. TAYLOR: I don't believe that's the case. I
17	think some of them would extend beyond that date. And so
18	what we've agreed to here is the remaining balance, as of
19	November 2014, will then be combined and amortized over one
20	year. The intent of that is they all have staggered ending dates,
21	which results in a number of rate changes throughout the next
22	couple of years. This is just to simplify that into one collection
23	period.
24	COMMISSIONER CLARK: And as the parties
25	discussed this provision, was there any kind of rough

	Hearing Proceedings 06/30/14	39
1	understanding of what the cumulative effect of this might be? I	
2	mean I recognize that some of these values are still	
3	prospective.	
4	Let's be off the record.	
5	(A recess was taken.)	
6	COMMISSIONER CLARK: On the record.	
7	MR. TAYLOR: Those amounts of those different	
8	amortization periods were discussed in Mr. Steven McDougal's	
9	testimony in the currently pending EBA document, and so that	
10	information is contained there.	
11	COMMISSIONER CLARK: Thank you.	
12	Now to paragraph 30. The first sentence begins,	
13	"The parties agree that the Commission may enter a deferred	
14	accounting order," and my question really just addresses the	
15	word "may."	
16	Is it that the parties are hesitant to direct the	
17	Commission to do something, but that you intend that in order to	)
18	effectuate the party's intents related to the stipulation, that the	
19	Commission will implement this, or is this truly discretionary for	
20	the Commission within the contemplated meaning of the	
21	stipulation?	
22	MR. TAYLOR: It's Rocky Mountain Power's	
23	understanding that the Commission will; however, we're always	
24	reluctant to specifically direct the Commission to do things.	
25	COMMISSIONER CLARK: And is that	

	Hearing Proceedings 06/30/14 40
1	DR. POWELL: I think that it was just a caution not
2	to appear to be telling the Commission what they had to do, but
3	the intent was that the Commission would enter into a deferred
4	accounting order and allow the Company to start deferring those
5	costs subject to the conditions laid out here.
6	COMMISSIONER CLARK: Ms. Beck, anything to
7	add to that?
8	MS.BECK: No.
9	COMMISSIONER CLARK: And so is it the approval
10	of the stipulation that would constitute, in the parties' minds, the
11	approval of the deferred accounting order, I mean assuming our
12	order mentions that in some way, or was there some further
13	process contemplated by the parties?
14	MR. TAYLOR: No. I believe that approval of the
15	stipulation, with a specific statement by the Commission to that
16	effect, would be adequate.
17	DR. POWELL: That would be acceptable to us.
18	COMMISSIONER CLARK: Okay. Thank you.
19	That concludes my questions.
20	Is there anything else to come before the
21	Commission at this time?
22	MR. COLEMAN: Mr. Commissioner, I have one
23	point of administrative business, I suppose.
24	The Office provided testimony in this present
25	docket, in the 13-35-184 docket, and specifically testimony from

	Hearing Proceedings 06/30/14 41
1	Messrs. Gimball and Chernick, that were filed under the cover of
2	the 184 docket. Intermingled with that testimony is Schedule
3	31-196, related testimony.
4	So as testimony in the 13-35-184 docket is
5	accepted into the record, as stipulated by the parties, I would
6	need and ask for the Commission to also take Mr. Gimball's and
7	Chernick's testimony that was filed under the 184 cover into the
8	196 docket.
9	I recognize that not all of it will be directly related
10	to the 196, but due to the intertwining nature of the testimony, I
11	think if that's acceptable to the Commission, I would make that
12	humble request.
13	COMMISSIONER CLARK: Is there any objection to
14	that?
15	We will do as you've asked, Mr. Coleman
16	MR. COLEMAN: I appreciate that. Thank you.
17	COMMISSIONER CLARK:consider the testimony
18	in the appropriate docket.
19	And if that applies to any other witnesses who are
20	addressing both of these dockets, we'll take the same approach
21	there.
22	Anything further in this docket?
23	Then just before we conclude, let me acknowledge,
24	on behalf of the Commission, our understanding, at least to
25	some level of the great effort that it takes on all the parties'

	Hearing Proceedings 06/30/14	42
1	parts to negotiate and achieve a stipulation in a case as	
2	complex as this one is.	
3	And we appreciate the diligence and the	
4	contributions of all the participants in the proceeding. Thank	
5	you very much.	
6	With that, we'll turn our attention to the stipulation	
7	in Docket No. 13-035-196.	
8	And let's take awe'll be in recess until ten after	
9	10:00. And everyone can take that opportunity to get the right	
10	paper in front of them, and we'll be recessed for seven minutes.	
11	Thank you.	
12	(A recess was taken.)	
13	COMMISSIONER CLARK: We're on the record.	
14	Before we take up Docket No. 13-035-196, I just	
15	want to go back to a question regarding the rate case stipulation	
16	and question I asked, just so you'll understand where I was	
17	coming from and that I'm now clearer on the subject.	
18	I've got the table in front of me that is from Mr.	
19	McDougal's testimony that relates to paragraph 27, and so I can	
20	see now that this answers my question. I think I misspoke	
21	myself when I asked the question referring to November 1,	
22	2014, rather than 2015. And what I was attempting to determine	
23	was that the amortizations in those dockets that are referred to	
24	in the first sentence of paragraph 27, but for that paragraph,	
25	would have been over shorter periods than otherwise. And I can	

	Hearing Proceedings 06/30/14 43
1	see that from the table, so thank you for referring me to that. I
2	hope I haven't further confused any of you.
3	Now to Docket No. 13-035-196.
4	Does any party intend to address this stipulation
5	besides the Company, the Division, and the Office?
6	Apparently not.
7	And we have the same witnesses, it appears to me,
8	is that correct, from each of those parties?
9	So let me just remind the witnesses they're under
10	oath, and let's begin with Ms. Hogle and Mr. Taylor.
11	MS. HOGLE: Thank you, Your Honor.
12	Preliminarily, I don't believe that the parties
13	indicated in the stipulation in the Schedule 31 for the admission
14	of their direct testimony in this proceeding. And accordingly, I
15	hereby move for the admission of the direct testimony of Rocky
16	Mountain Power, with exhibits, into the record in the case.
17	COMMISSIONER CLARK: And let's broaden that to
18	apply to all of the testimony that's been filed.
19	Is there any objection to the Commission receiving
20	all of the prefiled testimony and exhibits into evidence?
21	Then they will all be received.
22	(All prefiled testimony and exhibits received into evidence.)
23	COMMISSIONER CLARK: Thank you, Ms. Hogle.
24	MS. HOGLE: Thank you.
25	DAVID L. TAYLOR, called as a witness for and on

	Hearing Proceedings 06/30/14	44
1	behalf of Rocky Mountain Power, being first duly sworn, was	
2	examined and testified as follows:	
3	EXAMINATION	
4	BY-MS.HOGLE:	
5	Q. Can you please state your name and employment	
6	for the record?	
7	A. My name's David L. Taylor. I'm the same David L.	
8	Taylor that testified in the last hour before this Commission.	
9	Q. And what is the purpose of your summary here	
10	today?	
11	A. I'll briefly review the stipulation that's presented	
12	before the Commission today. I'll review some of the history	
13	that led up to it, as well as discuss the key elements of the	
14	stipulation.	
15	The stipulation has been reached by six signing	
16	parties. And I'll also confirm Rocky Mountain Power's support	
17	for the stipulation and the Company's belief that the stipulation	
18	is in the public interest.	
19	Q. Mr. Taylor, please proceed with the history of the	
20	stipulation.	
21	A. On December 4 of 2013, Rocky Mountain Power	
22	filed an application requesting to revise Utah Schedule 31,	
23	backup, maintenance, and supplemental power service. The	
24	Company proposed to require, rather than to offer as an option,	
25	for customers with certain levels of onsite generation to take	

	Hearing Proceedings 06/30/14 45
1	service under this schedule. The Company, in that filing, also
2	proposed a methodology for calculation of rates for backup
3	service under Schedule 31.
4	On December 12 of 2013, the Commission issued a
5	scheduling order, setting the procedural schedule for the case.
6	And then on January 22 of 2014, the Commission
7	revised that schedule to coincide with the cost of service, Phase
8	II, schedule in the general rate case Docket 13-035-184.
9	On May 22 of 2014, five intervening parties filed
10	direct testimony in the case. And there has been no rebuttal
11	testimony filed in this case.
12	Over the last few weeks, those parties have
13	entered into settlement discussions on rate Schedule 31. And
14	based upon those discussions, the parties have agreed to the
15	terms and conditions set forth in the stipulation, as presented
16	here this morning. That signed stipulation was filed with the
17	Commission on June 25, 2014. The stipulation is intended to
18	resolve all of the issues in this case, in accordance with the
19	respective terms and conditions as laid out therein.
20	All parties that filed testimony in the case have
21	signed the stipulation and we are not aware of any intervening
22	party that opposes the stipulation.
23	Q. Mr. Taylor, please summarize the key terms of the
24	stipulation for the Commission.
25	A. Certainly. And as I said earlier this morning, as I

	Hearing Proceedings 06/30/14 46
1	attempt to do this, if by chance I misspeak, the words and the
2	terms of the stipulation are the binding document, not what I say
3	this morning.
4	The parties, again, for the purpose of this
5	stipulation, agree and recommend that the Commission approve
6	the followingthis is in paragraph 11. This is a change to the
7	application paragraph within the tariff.
8	This says that all customers with onsite generation
9	of 1,000 kilowatts, up to and including 15,000 kilowatts,
10	regardless of their generation type, will be required to take
11	service under this schedule. All customers with onsite
12	generation exceeding 15,000 kilowatts will be served under a
13	special contract that will be negotiated by those parties and
14	approved by the Commission.
15	I will point out that this only applies to customers
16	that actually require backup service. If they have that
17	generation that provides emergency service to them in case of a
18	power outage, they do not need to take service under Schedule
19	31.
20	Paragraph 12 lays out and states that the
21	agreed-upon monthly backup facilities charge was calculated
22	based on the portion of generation planning reserves, a portion
23	of demand-related transmission costs and distribution costs,
24	where applicable. There was no agreement reached as to the
25	appropriate methodology to arrive at that agreed-upon backup

	Hearing Proceedings 06/30/14 47
1	facilities charge. What we agreed to is what the charges are,
2	not how we got there.
3	Paragraph 13, demand-related generation and
4	transmission costs that are not included in the backup facilities
5	charge are included in the agreed-upon daily power charge.
6	And it's designed in such a way that if a customer requires
7	backup service from the Company every day of the month, that
8	customer would pay essentially the same under rate Schedule
9	31 as they would under the applicable general service schedule.
10	Either that would be Schedule A for distribution voltage
11	customers or Schedule I for transmission voltage customers.
12	In paragraph 14, the charges and other terms
13	agreed upon by the parties are reflected in the Schedule 31
14	tariff that's attached as Exhibit A to the stipulation. The rates
15	under Schedule 31 will become effective on September 1, 2014.
16	That's concurrent with the Step 1 rate change in the 2014
17	general rate case, and there will be an additional change on
18	September 1, 2015. Again, that's concurrent with the Step 2
19	rate change in the general rate case.
20	Those rates are shown in Table 1 of the stipulation,
21	both the Step 1 and Step 2 rates are shown there.
22	And the proposed rates, as laid out here, are also
23	reflected in Exhibit C to the stipulation in the 2014 general rate
24	case that we've discussed here this morning.
25	Moving on to paragraph 16, the Company agrees to

## Hearing Proceedings 06/30/14

1	collect and maintain billing data on maintenance and backup
2	service. We will do our best to attempt to collect and maintain
3	outage data related to Schedule 31 customers' onsite
4	generation. We agree to provide the immediately preceding
5	three years' Schedule 31 customers' billing for backup service,
6	to the extent possible, and outage-related data to customers
7	with onsite generation. And you will find that information in the
8	next rate case, to the extent we have it available.
9	Moving on to the general terms and conditions of

the stipulation. As with most stipulations, these general terms deal with the obligations of the signing parties both to the stipulation and to each other. As with all settlements, this was reached through negotiation and a fair amount of compromise.

While all parties agree to the stipulated rate Schedule 31, each party may have come to that conclusion in a different way and may have used different approaches and assumptions to get there. Again, that's typical with many stipulations.

So, again, with that general background, the parties
agree that the stipulation, as a whole, is just and reasonable
and results in the public interest. The stipulation is an
integrated whole that any party may withdraw from it if it's not
approved without material change and condition by the
Commission.

25

Q.

11

12

13

14

15

16

17

18

Mr. Taylor, do you have any parting comments for

	Hearing Proceedings 06/30/14 49		
1	the Commission on the stipulation?		
2	A. Yes. Again, I want to thank the parties who worked		
3	to come to this agreement. This was no less hard to reach than		
4	the agreement in the general rate case. It took a lot of work		
5	and I just appreciate everybody working together to get to this		
6	final resolution.		
7	I restate the Company's support for the stipulation,		
8	it was negotiated in good faith by the parties. I believe it is in		
9	the public interest and I recommend the Commission approve		
10	the stipulation as filed.		
11	Thank you. That concludes my remarks.		
12	COMMISSIONER CLARK: Thank you, Mr. Taylor.		
13	Ms. Schmid?		
14	MS. SCHMID: Thank you.		
15	WILLIAM A. POWELL, called as a witness for and		
16	on behalf of the Division of Public Utilities, being first duly		
17	sworn, was examined and testified as follows:		
18	EXAMINATION		
19	BY-MS.SCHMID:		
20	Q. Dr. Powell, could you please state by whom you are		
21	employed and your position?		
22	A. Again, my name is Artie Powell. I'm with the		
23	Division of Public Utilities and I'm the manager of the energy		
24	section.		
25	Q. In that respect, did you participate on behalf of the		

	Hearing Proceedings 06/30/14 50
1	Division in this docket?
2	A. Yes, I did.
3	Q. Do you have a statement?
4	A. Yes, I do.
5	Q. Please proceed.
6	A. So, again, thank you for this opportunity to address
7	the settlement stipulation in this particular docket with respect
8	to Schedule 31.
9	I'll just make a few brief remarks here. The Division
10	did file direct testimony in this case. And in that testimony, we
11	stated that we were in general support of the Company's
12	proposal, but we did raise three issues that had some concern
13	for the Division.
14	First was the requirementor under the Company's
15	proposal, they were requiring that certain customers take power
16	under Schedule 31. It became clear, as part of our negotiations
17	and discussions on the docket, that the customers areat their
18	discretion, can nominate as little or as much power, under
19	Schedule 31, as they feel that they need to. So we thought that
20	provided enough flexibility that, even though the Company was
21	asking that this be a requirement, that it was a reasonable
22	requirement.
23	We also raised an issue of revenue neutrality. Just
24	looking at some of the responses from the Company on the data
25	request, we noted that it was the Company's intent that this was

	Hearing Proceedings 06/30/14 51
1	a revenue neutral change to Schedule 31, but we couldn't
2	reconcile that with a few other data requests.
3	Again, during our discussions with the Company
4	and other parties in negotiation, it became clear that it is indeed
5	revenue neutral for the Company; however, there would be bill
6	impacts for some of the customers under the Company's
7	proposal.
8	And that was the third issue that we raised. It
9	appeared that some of the bill impacts would be relatively large
10	for some of those customers. The stipulation, I think, addresses
11	this by increasing the facility's charge much less than what the
12	Company had originally proposed. And I think it will result in
13	rates that are reasonable and just and in the public interest.
14	And therefore, we recommend that the stipulation
15	be adopted by the Commission, as filed in this case.
16	Lastly, as Mr. Taylor addressed as one of the terms
17	and conditions of the stipulation, the Company will collect and
18	retain and submit certain data with its next rate case. This data
19	should help us to clarify and reset any rates necessary in that
20	case.
21	And that will conclude my remarks at this time.
22	COMMISSIONER CLARK: Thank you, Dr. Powell.
23	Mr. Coleman, Ms. Beck?
24	MICHELE BECK, called as a witness for and on
25	behalf of the Office of Consumer Services, being first duly

		Hearing Proceedings 06/30/14	52
1	sworn, was	examined and testified as follows:	
2	EXAMINATION		
3	BY-MR.COLEMAN:		
4	Q.	Ms. Beck, your name and title again, please.	
5	Α.	Michele Beck, director of Utah Office of Consumer	
6	Services.		
7	Q.	Did you guide the Office's participation in Docket	
8	13-035-196	?	
9	Α.	Yes, I did.	
10	Q.	Do you have a position statement from the Office?	
11	Α.	l do.	
12	Q.	Please proceed.	
13	Α.	The Office does not represent any customers who	
14	currently ta	ke service under a Schedule 31 or who will take	
15	service und	er the new Schedule 31; however, to the extent that	
16	any relevan	t costs aren't recovered from Schedule 31	
17	customers,	then they are paid for by other customers. Thus, the	е
18	office has a	in interest in the proceeding and participated fully to	)
19	ensure that	the resulting rates are just and reasonable for	
20	Schedule 3	1 and for the other customers.	
21		Based on our analysis, the Office believes that the	
22	Schedule 3	1 settlement is a reasonable compromise and is in	
23	the public i	nterest; thus, we recommend approval.	
24		COMMISSIONER CLARK: Thank you, Ms. Beck.	
25		Any questions?	

	Hearing Proceedings 06/30/14 5
1	Commissioner LeVar?
2	COMMISSIONER LEVAR: I'd just like to make sure
3	I'm understanding the party's intent on paragraph 14 and its
4	relationship to the general rate case.
5	Is the parties' understanding of that paragraph that
6	in the event that the September 1 date for the Step 2 of the
7	general rate case, if in the event that date is delayed by delay
8	of the Sigurd-Red Butte transmission line, is it the intent that
9	the Step 2 of the 196 docket still happen on September 1?
10	MR. TAYLOR: No. I think these rates would
11	change concurrent with the Step 2 change in the general rate
12	case.
13	COMMISSIONER LEVAR: So the language of the
14	"later of" would still apply to this, in your understanding?
15	MR. TAYLOR: Yes.
16	COMMISSIONER LEVAR: Did the Division and the
17	Office understand that paragraph the same way?
18	MS.BECK: Yes.
19	DR. POWELL: Yes.
20	COMMISSIONER CLARK: Any other questions?
21	MS. HOGLE: Your Honor, thank you. At this time,
22	Rocky Mountain Power would like to request a bench order in
23	this 13-035-196 case.
24	COMMISSIONER CLARK: Ms. Hogle, would you
25	elaborate on the purpose for your request?

	Hearing Proceedings 06/30/14 54
1	MS. HOGLE: Yes, Your Honor. Thank you. And
2	that's what my client was talking to me about.
3	The Schedule 31 stipulation establishes special
4	contracts that would be subjectthe pricing of which would be
5	subject to the Schedule 31 tariff. And given that we have an
6	effective date of September 1, 2014, for any special contracts to
7	be effective stemming from this Schedule 31 tariff, we would like
8	and really don't have a lot of time between now and then to
9	have those negotiated. And the pricing of the Schedule 31 tariff
10	would have to be effective by the time that those special
11	contracts relating to Schedule 31 would also be effective, thus
12	the reason for the request for a bench order.
13	COMMISSIONER CLARK: Any comments from any
14	other parties on the Company's motion?
15	MR. EVANS: If I might.
16	Yes, I think Ms. Hogle has identified a real timing
17	problem with the way this stipulation has been presented and
18	the time it has. Part of the stipulation moves some customers
19	under a special contract instead of under Schedule 31. And
20	those customers not only have to have the contract agreed upon
21	and negotiated, but submitted to the Commission for an
22	approval, a Division review and report, and a Commission order
23	all before September 1, if these customers are going to be able
24	to take backup service after September 1.
25	So we support this motion for a bench order at this

	Hearing Proceedings 06/30/14	55
1	point so that we can get the contract in place and submitted for	
2	a timely consideration by the Commission.	
3	COMMISSIONER CLARK: Thank you, Mr. Evans.	
4	Any other comments?	
5	DR. POWELL: I would just add, I think Mr. Evans	
6	kind of addressed our issue, but just to make sure, it would be	
7	helpful to the Division analysts that will be looking at those	
8	contracts and making recommendations if we knew what the	
9	Commission's decision was in this case. With that said, I would	
10	justthe sooner, the better.	
11	COMMISSIONER CLARK: Anything further?	
12	Let's be off the record, then, for just a couple of	
13	minutes.	
14	(A recess was taken.)	
15	COMMISSIONER CLARK: On the record, please.	
16	Any further comments?	
17	In the information, facts, and opinions that have	
18	been presented to the Commission this morning and in the	
19	stipulation itself, the Commission finds facts sufficient to base	
20	an order and to conclude that the stipulation should be	
21	approved. And we will issue a written order that memorializes	
22	those findings and conclusions and provides and elaborates on	
23	our reasoning.	
24	Anything further to come before the Commission at	
25	this time?	

1We'll see many of you on July 28. And thank you2very much for your participation and for your contributions to the3process that led to the stipulation in this docket as well.4We're adjourned.5(Concluded at 10:33 a.m.)6.7.8.9.10.11.12.13.14.15.16.17.18.19.20.21.22.23.24.25. 	Hearing Proceedings 06/30/14	57
1	CERTIFICATE	
2		
3	This is to certify that the proceedings in the	
4	foregoing matter were reported by me in stenotype and	
5	thereafter transcribed into written form;	
6	That said proceedings were taken at the time and	
7	place herein named;	
8	I further certify that I am not of kin or otherwise	
9	associated with any of the parties of said cause of action and	
10	that I am not interested in the event thereof.
