To: PSC@utah.gov

As part of a large remodeling job, my wife and I were going to install solar panels this summer to our house in the Avenues: 337 H. St., SLC. We will NOT do so if you are going to begin taxing households who want to conserve energy and move away from our community's reliance on fossil fuels.

Please use your head and move into the 21st. Century. Oppose Rocky Mountain Power's attempt to buttress our dependence on fossil fuels.

Thank you.

Robert and Kathleen Broadhead
