To Whom it may concern,

I formally request that the Public Service Commission **DENY** Rocky Mountain Power's request to assess a monthly fee on customers who install solar power installations on their property. In a time when alternative energy is greatly needed for addressing Utah's Air Quality issues and the price point for solar installation is finally starting to come down, this fee would be a new barrier to inhibit solar installation in Utah.

**Please DENY their request.**

I would be happy to speak further with you on this topic.

Regards,

*Robert Hooper*
