Mr Allen

I am writing you in connection of the new fee/ tax that has been proposed for those of us who have taken the initiative to purchase solar panels.

I did not go through this great expense to be penalized for doing so. If this fee goes through this is exactly what you are allowing them to do.

I still pay a MONTHLY FEE just to stay connected to RMP power lines.

I also over produce power that they get to use at no repayment to me It is not right that they then get to charge me more for that be it fee/ tax or what eve.

Do the right thing and oppose this

Thank you

Jay Randall
