Dear Utah Public Services Commission,

I understand that Rocky Mountain Power RMP has submitted a request from the PSC for a monthly fee to be paid my customers who choose to install solar panels on their homes and/or businesses. To be blunt, THIS IS OUTRAGEOUS and I am unalterably opposed to such a tax. If anything, the state of Utah should develop a tax structure to penalize the use of fossil fuels and to incentivize homeowners and businesses to shift to renewables such as solar and wind energy sources.

I encourage you in the strongest terms possible **to deny Rocky Mountain Power's request for a fee on solar power uses.** Thank you.

Sincerely,

Jack
