To: psc@utah.gov

When my solar panels produce 100% or more of the energy I need in any given month, my electric bill is still NEVER \$0.00.

I ALREADY pay fees to RMP for being tied to the grid and to help pay for their infrastructure, this is double jeopardy and the new charge would penalize me for doing the right thing.

Clean/Green power is something RMP should encourage and engage and not something they should fight against.
