Utah Public Service Commission:

I submitted a letter on July 18th to the Utah Public Service Commission regarding Docket 13-035-184 (see below for original email). I have recently been informed of a miscommunication regarding one of the businesses included on to the letter. EDF Renewable Energy did not intend to be included on the letter. I am writing to request that the original letter submitted be removed from the Public Service Commission's website, and replaced with the attached, corrected version to reflect the correct business representatives.

Thank you for your assistance,

Todd Stevens

Utah Public Service Commissioners
Ron Allen, David Clark and Thad LeVar:

RenewableTech Ventures respectfully submits the attached letter on behalf of 40 Utah business representatives concerned about the proposed net metering fee in Docket No. 13-035-184. Thank you for the opportunity to provide input on this issue. We have included of both PDF and Word versions of the letter for your convenience. Hard copies of the letter were delivered yesterday to your office.

Please feel free to contact me if you have any questions.

Kind regards,

Todd Stevens
