RECEIVED

Sirs, Madam,

I hereby file an official complaint to the way this matter was done/handled by both the city of Blanding and Rockey Mountain Power.

I have just received word of this transfer between the Blanding City and RMP being given by mail today. (Form Letter)

I have just read the email sent from Hal and Kammy Palmer just posted on the docket today and I agree totally with EVERYTHING said in that Palmer email about timing and notafications etc. we as customers received as below, RE:

*
* Utah Public Service Commission -
*
* <http://psc.utah.gov/utilities/electric/elecindx/2013/1303558indx.html>
* was modified: Tue Jul 16 2013 at 02:59:37 PM
*
* New information in the document:
* -----
* July 12, 2013
* Email Correspondence from Hal and Kammy Palmer
*

***** I also read all the other information in the docket records that stated no opposition to the transfer was received!! WHAT!????? No, I had not sent an email to the PCS since the info was not available at the link provided in the letters from RMP.

I had several long discussions with Bob Lively over the pst 6 weeks (I believe that is the main rep for RMP) and I was in the strongest opposition to such a transfer as I live OUT OF TOWN and one BIG reason being is that I do not wish to have any dealings what so ever with the Top Heavy Overpaid Blanding City Bureaucrats!!!!

He confirmed to me he had received some complaints about the takeover by the city of our RMP accounts. He said however he could not tell me whom they were for privacy reasons which I can accept. I also concur with the Palmer email all the info on the letters sent to us was late and the links to info was incorrect and or not available for us to comment. This is just being shoved down our throats I believe on purpose as the Palmers have brought out correctly in the email of July 12 to the commission!! (The link above)

In my experience over the years dealing with any middleman in anything mainly

involving ANY politicians has not been good. From the Bottom Up or the Top Down!! I would have suggested you would have polled each and every household involved as users for each of their input before doing all this seemly and hopefully?? with few noticing what was going on with these form letters (looked more like junk mail) with incorrect info within. The letters were worthless to us anyway since the links to the UPSC were not correct and led no where to this docket. I had to have Bob Lively personally send me an a personal email with the correct url link before I could see what was going on.. By then, it was already a done deal. FOUL!!!!!! Rates may possibly go lower or stay the same?? Ha Ha.. I bet!!! It appears what is the Blanding rate link is not what the real charges may wind up being since those of us being affected are not city residents, have no say or can vote on anything the city does or wants to do in the future! FOUL AGAIN!!

Either way, the cost will not cause me to file for bankruptcy, but I am mad as HELL for being forced to deal with the Blanding City for anything!

FYI, I moved OUT OF BLANDING to my present location in 1969 and was doing fine off all the grids (Power, phone etc.) until 1989 when I signed up with Rocky Mountain Power. I would not have tied to the grid however at that time if it involved dealing with the City of Blanding!

Your Comments?

Respectfully Yours,

Thomas Bradford
