At 3:59 PM, Brian Gwyn said the following:

Hi Thad, thanks for the connection! Just my two cents on the Rocky Mountain Power rate/fee increase proposals on solar. My opinion is more choices, not fewer is better for everybody. It's pretty clear that the costs RMP are proposing would essentially take the choice for solar away from homeowners. I'm for embracing the competition that solar and ALL other forms of energy production brings and as well as the creative problem-solving that is naturally inspired by that competition. Thanks!

Gary Widerburg <gwiderburg@utah.gov>

Subject: Public Service Commission

Request (Closed): Dear Governor Herbert, My job, the job of thousands, our economy, the climate and our environment are all at stake. I am employed in the solar industry as are several thousand others. I am begging you to stand up for our environment and economy and take a stand towards Rocky Mountain Power and help stop their request to increase the utility rates which would ultimately kill solar in Utah and cost thousands of people their jobs. Lets not be Nevada and instead lets do what is right for our great state of Utah. I honestly fear for my grandchildren. I ask myself almost daily if they will grow up with respiratory problems due to poor air quality or if they will never know what it is like to catch a fish because our climate warmed our lakes and rivers or if they will never experience snow. On November 9, Rocky Mountain Power filed a request before the Public Service Commission to raise rates on rooftop systems. The fees are among the highest proposed by any utility around the nation on rooftop solar customers. If imposed, the fees would effectively end the growth of the rooftop solar and devastate the solar industry in Utah. Subject: Public Service Commission

Request (Closed): Subject: Fee on owners of rooftop solar arrays. FYI, This is a copy of a letter I sent to the public service commission regarding advice #16-13, which requests fast-track status for imposing a fee on owners of rooftop solar arrays. Dear Commissioners: I would like to state that I oppose Advice # 16-13, which was filed Nov 9, 2016 by PacifiCorp- Rocky Mountain Power, regarding changing the rate structure for rooftop solar customers. Please do not grant fast-track decision making on this item. It is only fair to follow the normal rate-making process. It is inequitable to allow a fast-track process, especially when the rates of so many customers are at stake. There is no reason that this item has to be rushed, unless the utility wants to prevent evidence from being heard. A rush decision shortcuts the democratic process and should not be condoned in our great state of Utah. Circumventing the established process would create a black mark on our record. If there is to be a rate hike, it needs to be thoughtfully considered during a normal timetable. Besides, a decision that is railroaded through would leave the decision open to continual challenge and perhaps lawsuits on the basis of improper procedure. Moreover, the utility has not demonstrated proper care and correctness with its measures and statistics. "Behind the meter" consumption and energy production have not yet been adequately measured. No rate hikes should be allowed before complete data has been collected and analyzed. That could lead to an unsound decision that would just have to be researched and reviewed again. The claims of the utility are not logical. Solar customers are helping to add power to the grid. Because the power we create can be used by our neighbors, we reduce transmission costs. We are not a nuisance; we are contributors to a better power system. We have spent large sums of money to install our rooftop solar arrays. We should not be penalized for improving, diversifying, and modernizing our utility's power sources. Rather than having to pay extra fees, we should be compensated for the additional energy we add to the grid. Solar rooftop users are doing our part to clean the air and reduce particulate emissions, thus improving the health and quality of life of all Utahns. These contributions can only be partially measured in monetary terms. The sense of well-being created by cleaner air is a spiritual value that can't quite be quantified, but must not be shoved under the rug. Clean air should be a goal for the power company as well. Why is the power company trying to charge more on the very individuals who are doing the most to clear our air? Don't let the

power company bite the hand that feeds them and is doing the right thing. A rate hike would be likely to set us many steps backward in our progress toward cleaner emissions. This may drive out of Utah several of our productive solar companies, by creating unfair obstacles to their business models. Even Governor Herbert is trying to encourage clean companies to locate in Utah. In sum, there are many reasons why this rate hike would be a very bad idea for everyone except the executives of the utility company. I understand that your mission is to "to ensure safe, reliable, adequate, and reasonably priced utility service." If you allow an expedited decision on this proposed rate hike, it will create the appearance of favoritism and lack of fiduciary responsibility. I exhort you to uphold your mission by serving the best interests of your many solar constituents. Please oppose Advice # 16-13. Do not allow a fast-track decision for rate-hikes on solar customers. Sincerely, Rick Gamble

Thank you.

Request (Closed): Subject: Solar pricing in Utah Gov. Herbert, I am disappointed that you have not publicly denounced the back room dealings of Rocky Mountain Power as it relates to solar power. Utah has been a shining example of how to set the stage for small and large companies to succeed in any market, when the field is fair. Rocky Mountain Power's blatant power grab must raise red flags for all Utah government regulators to keep the field fair. This cannot and should not happen in the State of Utah. Our air, our community, and our businesses require your intervention. Please address these issues immediately. Kind regards, Bryce Barnett

Subject: Public Service Commission

Request (Closed): Subject: Rocky Mountain Power (Abuse of Power) I voted for Governor Herbert in the recent election. I am asking that the great state of Utah NOT allow Rocky Mountain Power to charge people more money for living smarter by installing solar systems on their homes! This is an abuse of power and very anti-consumerism. Rocky Mountain Power is trying to dramatically increase the cost of electricity for Utahns who want to power their homes with solar energy. This would destroy thousands of jobs, consumer energy choice, major benefits to our environment, economic growth and cost benefits to solar consumers in the state of Utah. The proposal is the most aggressive, anti-consumer and anti-solar proposal ever made by a utility in the United States. Thank you very much for your consideration and help in the matter.

Thank you.

Request (Closed): Subject: Anti-Solar Bill I want to give my full disappointment with any plans to make solar energy uneconomical for consumers. Let solar power not only exist, but thrive in Utah! Don't let this bill pass simply because Rocky Mountain has a monopoly in energy and they have a lot of power within the state legislature. People have

invested thousands of dollars and this would ruin it for them, and any others looking in the future. Not to mention the many jobs it would also get rid of. Please do the right thing for your constituents as a whole, and not just the big monster of RMP.

Thank you.

Constituent Services.

Subject: Public Service Commission

Request (Closed): Subject: Rocky mountain power's proposal Governor Herbert, I am concerned about the anti solar proposal that rocky mountain power has put forth. It stabilizes their monopoly on utah power, punishes those who are using clean energy, stops people from wanting clean solar energy, and would destroy thousands of utah jobs. Please do not take the choice away from the consumers and further monopolize the utah power. This proposal hurts more of utah's people than it helps.

Thank you.

Subject: Public Service Commission

Request (Closed): Subject: Solar Governor Herbert Last year you were one of those seeking a new ban on wood-burning stoves for air quality. Now we have a new proposal from Rocky Mountain power which is very hurtful to solar and removes several of the incentives in switching to this clean energy source. I would like to voice my concern to you on this matter since this is something that i believe is a much larger factor to our air quality than that of the VERY small pollution footprint brought on by epa-approved stoves. Rocky mountain power is seeking only for what is best for them as a company and is in no way looking for the best interest of consumers or the air quality, so please do all you can to stop them in their greedy proposals. We are all on the same team of trying to do what is best for one another and our planet, so please allow solar to continue and allow us to be more self-sufficient with our own home solar systems. Solar is good for everybody except the large corporations that only want a monopoly on consumers, which is why we need to stop this proposal. Thanks, Richard

Thank you.

Subject: Public Service Commission

Request (Closed): Subject: Solar I'm sure you're getting massive numbers of emails regarding the RMP requested changes to fees to solar customers. I work for a solar company and am getting solar on my home, so I'm a bit biased. But, the two main reasons I am so excited about my job and the chance to go solar are the environment and the financial considerations. It is very disheartening to see and hear about the poor air quality in our valley. I am excited about the steps the state has taken to move towards cleaner energy but this change would be a step in the wrong direction. The growth of jobs and companies has been great for the valley as well. I recommend you reject the requested rate changes. Thanks for taking the time to read my message. - Colin Davis

Request (Closed): Subject: Rocky Mountain Power Rate Change Hello, Please help Utah consumers and do your part to stop the Rocky Mountain Power monopoly. The proposal to put what is essentially a "sin tax" on solar is outrageous. It's rare for someone to find something that is so unequivocally bad for the environment and bad for business, but RMP has managed to do so. We as Utah consumers and residents have put our trust in you to do what is right and stand up against this policy that is a no-win situation. Thank you for doing what is right! Sincerely, Tyler Soukup Salt Lake City Resident

Subject: Public Service Commission

Request (Closed): Subject: RMP Solar Rate Increase Hello, I have concerns regarding the proposed solar rates from RMP. Ultimately, this rate increase would bring solar to a halt in Utah. How could this not be seen as an attack on the countless jobs, the environment, and the economy of Utah? More outrageous is the fact that you commissioned RMP to conduct the study on net metering. This is a direct violation of conflict of interest. You cannot base a decision of this magnitude on a study done from the very company with the most to profit. We have seen this in history. For example, the Manville asbestos factory was proven to have changed test results and studies for their profit. This in return led to what is described as "The greatest corporate murder in history". Killing countless people and causing massive health problems was worth the profit loss they would incur for telling the truth. How much more likely would it be for Rocky Mountain Power to leave positives out of reports or be one sided as to the costs. How easy would it be for them to justify raised costs if a company like Manville Co. could justify killing thousands of people? What does this tell our future generations of citizens? Are we this near sighted to let a profit stop our society from a cleaner brighter future? Do you see the irony in programs such as the Wattsmart incentives stating that reducing power usage reduces the amount of power plants and costs needed? Lastly, states like Nevada that passed similar fees saw a reduction of 93% of solar contracts. Dropping from 1,311 to 90 solar applicants. The average solar home reduces 9,603 lbs of c02 emissions every year. This is a difference of 11,725,263 lbs of c02 that Nevada would have avoided. If this is the difference of one year of installations can you imagine the impact Nevada would have had if they continued at the same pace? I implore you to broaden your scopes beyond your pocket books. Weigh the costs of our environment and economy to one monopolies pennies. Sincerely, Jeff Penrod

Subject: Public Service Commission

Request (Closed): Dear Governor Herbert, On November 9, Rocky Mountain Power filed a request before the Public Service Commission to raise rates on rooftop systems. The fees are among the highest proposed by any utility around the nation on rooftop solar customers. If imposed, the fees would effectively end the growth of the rooftop solar and devastate the solar industry in Utah. The solar industry provides almost 4000 jobs in the state and hundreds of millions of dollars in economic activity. All of which will be negatively affected if these fees are put into place. You only have to look toward Nevada to see the effect. Their commission imposed outrageous fees on owners and overnight hundreds of solar industry jobs were lost. Utah prides itself as a economic development state. Your office has worked hard to cultivate growth and it has paid off. If these fees are imposed one of the fastest growing industries in the state will be greatly harmed. Your leadership on this issue is critical. Thank you for your time.

Subject: Public Service Commission

Request (Closed): Governor Herbert, I am asking that you support the growth of solar energy options in Utah and do not permit Rocky Mountain power to add fees to families that choose solar options. By doing this it shows your support for healthy air and alternative energies in Utah. A majority of the people in Utah are concerned about air quality. It affects many people's health. The fact that so many individuals and families have taken it upon themselves to opt for solar power shows you the support this has from your constituents in Utah. By saying no to RMP you show your concern for the many people who are affected by our poor air quality. RMP can opt to support solar energy which I know they have begun to do just as they have with wind power. This is where they should put their focus. They need to move forward in their energy options program not backwards. It is time to move forward and choose cleaner energy options. I know your leadership supports this. Diane Schaefer 3137 s 3360 e Salt Lake City, Utah Sent from my iPad

Subject: Public Service Commission

Request (Closed): Dear Governor Herbert, On November 9, Rocky Mountain Power filed a request before the Public Service Commission to raise rates on rooftop systems. The fees are among the highest proposed by any utility around the nation on rooftop solar customers. If imposed, the fees would effectively end the growth of the rooftop solar and devastate the solar industry in Utah. The solar industry provides almost 4000 jobs in the state and hundreds of millions of dollars in economic activity. All of which will be negatively affected if these fees are put into place. You only have to look toward Nevada to see the effect. Their commission imposed outrageous fees on owners and overnight hundreds of solar industry jobs were lost. Utah prides itself as a economic development state. Your office has worked hard to cultivate growth and it has paid off. If these fees are imposed one of the fastest growing industries in the state will be greatly harmed. Your leadership on this issue is critical. Thank you for your time.

Thank you.

The solar industry provides almost 4000 jobs in the state and hundreds of millions of dollars in economic activity. All of which will be negatively affected if these fees are put into place. You only have to look toward Nevada to see the effect. Their commission imposed outrageous fees on owners and overnight hundreds of solar industry jobs were lost. Utah prides itself as a economic development state. Your office has worked hard to cultivate growth and it has paid off. If these fees are imposed one of the fastest growing industries in the state will be greatly harmed.

Thank you.

Subject: Public Service Commission

Request (Closed): Dear Governor Herbert, How is this justified? Everyone can see the writing on the wall and actions like these are deplorable and an embarrassment to the human race. On November 9, Rocky Mountain Power filed a request before the Public Service Commission to raise rates on rooftop systems. The fees are among the highest proposed by any utility around the nation on rooftop solar customers. If imposed, the fees would effectively end the growth of the rooftop solar and devastate the solar industry in Utah. The solar industry provides almost 4000 jobs in the state and hundreds of millions of dollars in economic activity. All of which will be negatively affected if these fees are put into place. You only have to look toward Nevada to see the effect. Their commission imposed outrageous fees on owners and overnight hundreds of solar industry jobs were lost. Utah prides itself as a economic development state. Your office has worked hard to cultivate growth and it has paid off. If these fees are imposed one of the fastest growing industries in the state will be greatly harmed. Your leadership on this issue is critical. Thank you for your time.

Thank you.

Subject: Public Service Commission

Request (Closed): Dear Governor Herbert, I am writing to ask you to oppose Rocky Mountain Power's recent request to the Public Service Commission to raise rates for homeowners who choose to install rooftop solar systems (Docket 14-035-114). This year my family decided to invest in a rooftop solar system for our home in Salt Lake City. While my wife and I earn a fairly decent income with one child, I am paying off school loans and we have a sizable mortgage. But we felt the investment in solar was important for many reasons. We deeply care about being self-reliant, having clean air, and having a healthy environment. Our investment also contributed to the local economy and helped provide jobs for the solar industry. As I understand, the industry provides jobs for about 4,000 people and it is growing! Indeed, having a Federal and State tax credit certainly helped make this investment affordable for us initially. But we would not have made the investment if the rate fees that Rocky Mountain Power is now proposing existed. As I understand, the fees they are proposing would be among the highest by any utility around the nation on rooftop solar customers. If imposed, the fees would no doubt end the growth of the rooftop solar and devastate the solar industry in Utah. The same thing happened in Nevada earlier this year. There the Nevada Public Service Commission imposed outrageous fees just as the solar industry was taking off and immediately the industry collapsed, and many people lost their jobs. What Rocky Mountain Power is now proposing is a very aggressive rate increase proposal with a very short deadline. The arguments they are making is that rooftop solar owners are "underpaying" cost of service and adversely affecting non-solar customers under the current net metering arrangement. But in reality, the reverse may be true. As a whole, rooftop solar on homes and businesses are helping the power company to reduce long-term capital investment costs, avoid energy costs, and reduce environmental compliance costs. Also, when the power company recently examined the costs and benefits of rooftop solar, they only assessed the economic benefits and costs. But how do you put a value on clean air? How do you put a value on public health? We all know that solar power brings tremendous benefits to our community and planet, even if the power company deems these benefits "unquantifiable". Utah prides itself as an economic development state. Your office has worked hard to cultivate growth and it has paid off. If these fees are imposed one of the fastest growing industries in the state will be greatly harmed. Please oppose these rate increases. Your leadership on this issue is critical. Thank you for your consideration, Ross Chambless 558 East Cleveland Avenue Salt Lake City, Utah, 84105

Thank you.
