

Calendar Year 2013 EBA/Rocky Mountain Power  
March 14, 2014  
EBA Additional Filing Requirement 8

**EBA Additional Filing Requirement 8**

The estimated wind integration costs in the energy balancing account (EBA) period and supporting documentation for the calculations.

**Response to EBA Additional Filing Requirement 8**

Wind integration costs were estimated for 12 months ended May 2013 in the prior general rate case (GRC), Docket No. 11-035-200, to be \$3.44 per megawatt-hour (MWh). The Company has not updated this analysis nor does it separately identify wind integration costs in its actual net power costs (NPC). Please refer to Confidential Attachment EBA AFR 8 -1, which provides the calculation, and Attachment EBA AFR 8 -2, which provides an extract of the Direct Testimony of Company witness Gregory N. Duvall from the prior GRC, Docket No. 11-035-200.

Confidential information is provided subject to Utah PSC Rule 746-100-16.
