I am sending this email to voice my opposition to the proposed changes trying to be made by Rocky Mountain Power in Case 14-035-T08. In the past, Rocky Mountain Power has unfairly given preferential treatment to retailers in the sale of CFL and LED lamps. Rocky Mountain Power would send a rebate to the many different retailers for selling certain CFL's and LED's. RMP would not do the same thing for Electrical Distributors or other channels to the end user. The new proposal wants to even take away more of the downstream incentives and go all thru retail upstream incentives.

The upstream method of rebates to just retailers is unfair to other market channels in 2 ways. You are paying rebates to retailers who sell the CFL and LED lamps **to anyone**. 40 – 50 % of the lamps sold by retailers are not bought by customers that are served by Rocky Mountain Power. They are customers of Municipalities and REA's. It is not fair for Rocky Mountain Power customers to subsidize not RMP customers. Second, it is unfair to cut out Electrical Distributors and other channels to sell products.

The downstream method is a better way for Rocky Mountain Power to serve their customers and not subsidize non RMP customers. Do not let Rocky Mountain Power give more advantages to the Retailers.

Thanks

Keith Waters
