
ELECTRIC SERVICE SCHEDULE NO. 118 - Continued

ENERGY EFFICIENT MEASURES: (continued)

Supplemental Measures – Electrically Heated Homes:

- (1) Attic ventilation, excluding power ventilators when installed with ceiling insulation (required if needed at the time ceiling insulation is installed). Whole house mechanical ventilation and spot ventilation for kitchen and baths at time ceiling insulation is installed: Always considered cost effective.
- (2) Ground cover and water pipe wrap when installed with floor insulation; other vapor barrier materials as required when installed with floor or ceiling insulation: Always considered cost effective.
- (3) Forced air electric space heating duct insulation and sealing in unheated spaces: 20 years.
- (4) Weather stripping and/or caulking, including blower door assisted air sealing and duct sealing: Always considered cost effective.
- (5) Thermal doors: 20 years.
- (6) Timed thermostats on centrally controlled multi-room heating/cooling systems except when used with heat pumps: Always considered cost effective.

Supplemental Measures – No Electric Heating System Requirement:

- (1) Energy efficient showerheads and aerators where electric water heaters are present: Always considered cost effective.
- (2) Refrigerators with monitored results or listed in the Weatherization Assistance Program Technical Assistance Center data base with a savings-to-investment ratio of 1.0 or greater may be replaced with an Energy Star model with estimated annual consumption of 500 kWh or less. Refrigerator usage will be monitored for a minimum of 72 hours. Replaced refrigerators must be removed and recycled in accordance with EPA guidelines: 20 years.
