

January 20, 2016

Dear Member,

Our wholesale provider has informed us that we will have an 8% rate increase beginning July 1, 2016. This entire increase is due to additional controls being forced upon the power plant by the EPA in their effort to reduce coal use. The Bridger Valley Electric Board of Directors has approved a pass through rate increase which will also be effective July 1, 2016. I understand that rate increases are never welcome. However, when the wholesale rate increases we must pass that cost through to the members or we soon would lack the resources to maintain a reliable infrastructure. Our mission is to provide safe, reliable, and affordable energy to the owners of this cooperative.

For the residential and small general service classes, the facility charge will be \$36.00 and the energy charge will be \$0.07.

We have organized three meetings to discuss the change in rates. You are welcome to attend any of them as your schedule permits. All meetings will begin at 6:00 p.m. and will last until we can address all your questions.

**March 7<sup>th</sup> Daggett County Commission Chambers in Manila.**

**March 8<sup>th</sup> Community Center in Farson.**

**March 10<sup>th</sup> Lyman Town Hall.**

Best Regards
