

ELECTRIC SERVICE SCHEDULE NO. 118 - Continued

ENERGY EFFICIENT MEASURES: (continued)

Supplemental Measures – Electrically Heated Homes:

- (1) Attic ventilation, excluding power ventilators, whole house mechanical ventilation and spot ventilation for kitchen and baths: Always considered cost effective.
- (2) Ground cover when installed with floor insulation; other vapor barrier materials as required when installed with floor or ceiling insulation: Always considered cost effective.
- (3) Forced air electric space heating duct insulation and sealing in unheated spaces: 20 years.
- (4) Weather stripping and/or caulking, including blower door assisted air sealing and duct sealing: Always considered cost effective.
- (5) Thermal doors: 20 years.
- (6) Timed thermostats on centrally controlled multi-room heating/cooling systems except when used with heat pumps and Smart thermostats with occupancy sensors: Always considered cost effective.

Supplemental Measures – No Electric Heating System Requirement:

- (1) Energy efficient showerheads, aerators and pipe insulation where electric water heaters are present: Always considered cost effective.
- (2) Refrigerators with monitored results or listed in the Weatherization Assistance Program Technical Assistance Center data base with a savings-to-investment ratio of 1.0 or greater may be replaced with an Energy Star model. Replaced refrigerators must be removed and recycled in accordance with EPA guidelines: 20 years.
