Commission Secretary

Re: Docket No. 17-035-31

Rocky Mountain Power's 2017 Net Metering Report to Utah - Request for

Extension of Time, in part

Reference Docket No. 08-035-T04

Pursuant to Commission order in Docket 08-035-T04 and R746-312-16, by July 1st of each year the Company is required to submit to the Commission its Net Metering Report for the previous calendar year.

Due to the significantly increased volume of net metering customer participation, it would be administrative burdensome for PacifiCorp d/b/a Rocky Mountain Power ("the Company") to provide some of the required information in the Net Metering Report by the due date of July 1, 2017. Therefore, the Company hereby requests a 90 day extension to provide certain information required in the Net Metering Report. Under the requested extension, the Company anticipates that it will file the Net Metering Report as required by July 1, 2017, however, excluding information pursuant to the extension. The Company would then update the report with the required information by the end of the 90 day extension period.

The specific information for which the extension is requested is as follows:

- 1. Section 5: Total Value of Expired Credits
 - a. Customer Count
 - b. Total Expired kWh
 - c. Total Value
- 2. Section 6: Excess Net Metering Generation per Month in its entirety
- 3. Attachment A
 - a. kWh- Credit -2016 by customer
 - b. Value Excess Generation- 2016 by customer

Public Service Commission of Utah May 12, 2017 Page 2

The impacted information is related to the kWh credits that expire at the end of the annual billing period. Currently, accurately determining the number of kWh credits to expire requires manual review for each of the approximately 19,000 net metering customers interconnected prior to March 2017. While some manual review will always be required to correctly provide this data in future years, the Company is working on system upgrades to provide the bulk of the information without manual intervention. It is expected that such system upgrades will allow the Company to provide the complete Net Metering Report in the future on the regular due date of July 1st of each year.

On April 17, 2017, the Company met with representatives of the Division of Public Utilities and the Office of Consumer Services to review the challenges in providing the required information by the July 1, 2017 due date, and to explain the efforts being made to ensure that in the future the Net Metering Report can be submitted on a timely basis. The Company asserts that neither party objected to the Company proposal for a 90 day extension for the identified sections.

The Company, therefore, respectfully requests an extension of 90 days to submit the net metering information identified above.

It is respectfully requested that all formal correspondence and staff requests regarding this matter be addressed to:
