RE: Docket 18-035-08 – Application of Rocky Mountain Power for Approval of the Renewable Energy Contract between PacifiCorp and the University of Utah and the Related Agreement with Amor IX, LLC
Compliance Filing – Notification of System Impact Study

The Public Service Commission of Utah (“Commission”) issued an Order on May 22, 2018 in the above referenced proceeding (“Order”). The Order approved the renewable energy contract between PacifiCorp and the University of Utah, pursuant to Schedule 32 and a renewable resource purchase contract between PacifiCorp (“Company”) and Amor, the developer of a geothermal generation facility with an expected nameplate capacity of about 20 megawatts located in Churchill County, Nevada. As part of the Order, the Commission adopted a recommendation made by the Office of Consumer Services that the Company notify the Commission when it receives a determination as to whether network upgrades are required and, if such upgrades are necessary, state if the renewable resource purchase contract is to be terminated or identify any arrangements made between the Company and Amor.

In compliance with the Order, the Company notifies the Commission that on June 8, 2018, the final System Impact Study (“SIS”) was completed for the facility in this docket. The SIS evaluated the request for Network Resource status for Amor IX and if any additional Direct Assignment Facilities or Network Upgrades are required to provide the requested service. The SIS concluded that no additional transmission upgrades were identified to deliver the requested firm transmission service.

Questions may be directed to Jana Saba at (801) 220-2823.

Sincerely,

Joelle Steward
Vice President, Regulation
