Dear PSC,

As an owner of rooftop solar panels and a customer of RMP, I would like you to know that i feel that the value of expired net metering credits are not being used as effectively as they could be to provide additional assistance to low income families. I very much support the recommendation to transfer these funds to the Weatherization Assistance Program.

Please help ensure that the funds provide additional support for low income programs rather than offsetting cost.

Thank you,
Ryan Metzger
