To: psc@utah.gov

We formally request that the PSC place a hold on Rocky Mountain Power's Draper to South Jordan Upgrade Project while there is a formal investigation on the safety of this project. RMP should not be allowed to proceed until completion of the investigation and any following hearings are held.

We feel it is in the best interest of the public, students, and homes to not allow a potentially unsafe project to proceed until after it is deemed safe.

Thank you for your consideration and prompt response.

Regards,

CASPR LLC
