Attention: Gary Widerburg
Commission Secretary

**Re: Docket No. 19-035-14
2018 Annual Report of the Blue Sky Program**

Enclosed for electronic filing is Rocky Mountain Power's Annual Report of the Blue Sky Program for the period of January 1, 2018 through December 31, 2018.

It is respectfully requested that all formal correspondence and staff requests regarding this matter be addressed to:

By E-mail (preferred): datarequest@pacificorp.com
michael.snow@pacificorp.com

By regular mail: Data Request Center
PacifiCorp
825 E. Multnomah Blvd., Suite 2000
Portland, OR 97232

Informal inquiries regarding this matter may be directed to me at (801) 220-4214.

Sincerely,

Michael S. Snow
Manager, Regulatory Affairs

Enclosures

2018 Blue Sky Block and Bulk Program - Summary Report

Program Management Commentary

Customer counts continue to increase year-to-year. A few business partner reductions have been received due to competing tariffs being offered by the Company, resulting in slightly reduced revenues. Program outreach efforts will increase in 2019 and 2020 to increase participation rates. The release of \$1.2M in Blue Sky Build Project funds is also expected to increase grant application traffic resulting in additional community outreach events. No critical risks identified at this time.

Program Sales Summary

	2016	2017	2018	2016-17 Growth %	2017-18 Growth %
Total Company Block Sales	3,587,626	3,422,813	3,403,975	-4.6%	-0.6%
Total Utah Block Sales	1,664,531	1,653,532	1,644,891	-0.7%	-0.5%
Total Company Program Net Revenues	\$4,732,147	\$4,707,028	\$4,721,907	-0.5%	0.3%

2018 Program Marketing and Communications Highlights

BLUE SKY LEGACY - GREEN BUSINESS AWARDS

Four business customers were recognized in October 2018 for their long-standing Blue Sky partnerships. Park City, Utah was presented with the Blue Sky Legacy Community award; small business awards were presented to Squatters Brewery, Mazza Restaurant and Vertical Diner.

BLUE SKY CUSTOMER SURVEY

Survey was completed in 4th quarter 2017. Analysis completed and program strategy and outreach campaign has been created to increase engagement with business customers and to improve communication of participant impact. Program block upgrades are planned, along with the program's 20-year anniversary campaign to increase participation through multiple channel outreach efforts.

2018 BLUE SKY EVENT HIGHLIGHTS

Several renewable energy grant projects were completed during 2018 and Blue Sky Program participants were recognized through multiple media channels locally and nationally. One of the projects, the North Sanpete School District, has been nominated for two awards recognizing the project for excellence in innovation and for expansion of renewable energy growth.

[Community of Grace Presbyterian Church](#)

[Bluffdale Fire Station #92](#)

[Christian Center of Park City](#)

BLUE SKY GRANT PROCESS

A new web-based software program has been launched to enable grant applications to be received year-round. Several more applications are expected to be submitted during second quarter of 2019 once all software testing is completed.

EVENTS AND COMMUNICATIONS

Blue Sky was featured at several different events during 2018 including Utah Clean Cities 25th Anniversary Celebration at Loveland Living Planet Aquarium, the NetZero Energy Summit and the Hill Airforce Base Airshow in Ogden. The curriculum at Junior Achievement's BizTown at Gateway in Salt Lake City was also updated to include Blue Sky and teach students about the importance of renewable energy.

2018 Blue Sky Block and Bulk Program - Project Commitments

Utah Project Commitments

[Return to Summary](#)

[Return to Dashboard](#)

[Available Funds Criteria](#)

Existing Project Name	City	Technology	Size (kW)	Committed Funds	Status
Bluffdale City Fire #91	Bluffdale	Solar	40	\$85,139	Closing
Bluffdale City Hall	Bluffdale	Solar	56	\$119,494	Closing
Centro Civico	Salt Lake City	Solar	64.6	\$120,000	In Progress
SLC Corporation	Salt Lake City	Solar	115	\$140,000	In Progress
SpyHop	Salt Lake City	Solar	40.9	\$77,472	In Progress
State of Utah DFCM	Salt Lake City	Solar	242.19	\$260,000	Closing
Utah Department of Transportation	Taylorsville	Solar	176.2	\$246,630	In Progress
Utah State University	Logan	Solar	100	\$200,495	In Progress
Park City Museum Education & Collections Center	Park City	Solar	22.68	\$37,740	Closing
STEP Solar Battery Project	TBD	Solar/Battery	TBD	\$1,900,000.00	In Progress
Blue Sky Build (1) *	TBD	Solar	TBD	\$0.00	Cancelled
Blue Sky Build (2) **	TBD	Solar	TBD	\$2,096,635.00	Under Contract
Total Existing				\$5,283,605.00	

* \$1,200,000 for Blue Sky Build project being returned to general fund as available funds for projects due to cancellation of North Temple Office project.

** Blue Sky Build project is expected to be completed in Ogden, UT by Dec 2019; Studies for a project in Moab, UT are scheduled to begin in April 2019.

2019 - New Projects Awarded

New Project Name	City	Technology	Size (kW)	Committed Funds	Status
Salt Lake City Boys & Girls Club	Salt Lake City	Solar	96.6	\$209,116	Launch
New Boys & Girls Club located near North Temple and 600 West; construction underway.					
The Inn Between	Salt Lake City	Solar	136.3	\$230,661	Launch
New location for hospice center for homeless citizens.					
Cottonwood Presbyterian Church	Murray	Solar	44.16	\$80,690	Launch
Main government building in Bluffdale City, hosts several community-based events.					
			277.1	\$520,467	

Project Standards and Evaluation Criteria

Rocky Mountain Power favors projects and activities that:

Result in the production of renewable electricity
Support communities through a strong education and public engagement component
Support a Blue Sky customer project/community
Provide strong environmental and economic benefit to local communities and Rocky Mountain Power/Pacific Power customers
Build regional capability
Take advantage of other funding sources available to support the project
Are owned by a non-profit organization, school, tribal government, religious institution or other community-oriented organization

Each application is reviewed with the following consideration given to the individual project. Does the project:

Assist in the creation of new renewable electricity sources within PacifiCorp’s Rocky Mountain Power/Pacific Power service areas
Stimulate renewable energy development by increasing the capacity of individuals, community groups or other organizations to undertake and support renewable energy development in their respective communities
Encourage research and development of renewable energy sources
Promote education in the community on new renewable energy generation and increase knowledge of Blue Sky program

The following criteria are considered equally - however if any one measure carries more weight it is community benefit:

<p>Timeframe - How quickly will the project move forward? Is the proposed installation timeframe reasonable? Projects are expected to be on line within 12 months, unless agreed to otherwise. Extensions are granted on a project-by-project basis (e.g. installations associated with new construction are expected to be online with 24 months.) What is the probability of completion within the proposed timeframe? Have potential delay risks been identified and properly mitigated? Has an adequate amount of pre-development work been completed? Has the applicant had preliminary conversations with the utility regarding net metering/interconnection? Are there significant challenges associated with interconnection? Have all required permits and approvals been accurately identified? Are any critical approvals pending or unlikely to be secured?</p>
<p>Site – Is the project sponsor ready to proceed with the project (i.e. efforts undertaken related to feasibility, financial agreements, permitting). Can the site effectively host a renewable energy project? Is permitting required? Have rights, options or leases been granted to secure site control? What is the probability of the project being built?</p>
<p>Financing – Is there an adequate financial structure that will ensure it’s completion within the timeframe specified? Is the customer or vendor a reliable business partner? Is there adequate financial structure that will ensure the project's completion within the allotted timeframe? Does the applicant have longevity at the site? Does the applicant appear to be financially stable/reliable? Are there undue financial risks which would put the project in jeopardy? Have potential risks been identified and mitigated? Does the applicant have a financial stake in the project that ensures it's completion.</p>
<p>Project Champion/Project Team - What is the experience of the developer? Is there a dedicated project proponent with a long-term stake in the project’s success and who will work to overcome obstacles in making this project happen? What is the relevant experience of the project team? Have all required team members been identified? Is the organization and project team effective and responsive?</p>
<p>Additionality - Can these funds be used to make the difference in bringing additional renewable resources on line? Are Blue Sky funds required for the project to be successful? Is the proportion of cost requested reasonable? Are there other secured or pending sources of funding besides Blue Sky?</p>
<p>Fuel Source - Is the renewable resource eligible under the tariff - wind, solar, geothermal, certified low-impact hydro, pipeline or irrigation canal hydroelectric system, wave energy, low-emissions biomass based on digester methane gas from landfills, sewage treatment plants or animal waste and biomass energy based on solid organic fuels from wood, forest or field residues or dedicated crops that do not include wood pieces that have been treated with chemical preservatives such as creosote, pentachlorophenol or copper chrome arsenic to help facilitate the commercial application of renewable energy technologies.</p>
<p>Technology - Is the planned energy source eligible? Is the proposed technology appropriate for the site? Is the technology proven and established and is the equipment covered under warranty? If not, is there research and development value to the project? Are there undue technical risks putting the project completion in jeopardy? Have technical risks been mitigated? Is the energy generation estimate accurate and supported by well-documented calculations? Is the capacity factor reasonable? Has maintenance of the system been properly addressed to ensure long-term operations? Does the project encourage new or emerging technologies?</p>
<p>Availability - Is the project owner willing to allocate RECs generated by the project to the Blue Sky program?</p>
<p>Cost - Are the total project costs and cost-share requested reasonable based on industry standards/for the proposed technology/size/location? Were multiple bids received from competitive contractors? Does the budget represent the maximum value for the price?</p>
<p>Geography - Proportional contribution to Pacific Power/Rocky Mountain Power service areas: CA, ID, OR, UT, WA, WY based on Blue Sky option customer subscription levels</p>
<p>Community Benefit - Can benefits be leveraged for the community and Blue Sky customers? What are the secondary environmental, social and economic benefits? Does the project help build regional renewable energy expertise? Does it stimulate the regional renewable energy marketplace? Is the community aware of and supportive of the project? Is it likely that there will be negative impacts from this project? How will the facility help educate the community about the benefits of renewable energy and the Blue Sky program? How does the project tie into the mission of the host organization? Are the project goals consistent with those of the Blue Sky program? What is the level of community participation in the Blue Sky program where the project will be located? Is there a plan to recognize the Blue Sky program and participating customers for their contribution to the project? Does the project offer unique/new exposure to Blue Sky? Is the project highly visible?</p>

As a Blue Sky participant in 2019, your participation will likely include the following resources:

Blue SkySM Block 2019 Prospective Product Content Label¹

Blue Sky Block is sold in blocks of 100 kilowatt-hours (kWh). Blue Sky Block is a Renewable Energy Certificate (REC) product and does not contain electricity, which is billed separately. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy. For more information visit rockymountainpower.net.

In 2019, Blue Sky Block will be made up of the following new renewable resources averaged annually.

Green-e Energy Certified New ² Renewables in Blue Sky Block 2019		Generation location
Solar	60%	(OR, WA, CA, ID, UT, WY and/or the broader Western region)
Wind	40%	
Total Green-e Energy Certified New Renewables	100%	

1. These figures reflect the renewables that we plan to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the electricity you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

In 2017, the "basic fuel mix", the average mix of energy sources supplying Rocky Mountain Power customers, is 58.89% coal, 10.57 natural gas, 8.56% wind, 7.09% hydro, 3.54% solar, 0.39% geothermal, 0.37 biomass, and 10.59% miscellaneous. This information is based on Federal Energy Regulatory Commission Form 1 data. The Rocky Mountain Power "basic fuel mix" is based on energy production and not resource capability, capacity or delivered energy.

All or some of the renewable energy attributes associated with wind, biomass, geothermal and qualifying hydro facilities in Rocky Mountain Power's fuel mix may be: (a) used to comply with renewable portfolio standards or other regulatory requirements, (b) sold to third parties in the form of renewable energy credits and/or other environmental commodities or (c) not acquired. Rocky Mountain Power's basic fuel mix includes owned resources and purchases from third parties. As of March 16, 2018, not counting compliance use, approximately 40 percent of the renewable energy attributes associated with 2017 generation and purchases was sold to third parties or not acquired. This percentage may increase upon subsequent company sale of renewable energy certificates representing 2017 generation.

The average Rocky Mountain Power residential customer uses approximately 709 kWh per month.

Energy
CERTIFIED

Blue Sky Block products are Green-e Energy certified, and meet the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at www.green-e.org.

*Your participation in the Blue Sky program helps to reduce the carbon footprint associated with your electricity use. Environmental benefits derived by comparing the Blue Sky mix with Green-e Residual Mix Emission Rates for US Customers (WECC) April 2017. Green-e Energy does not certify or verify carbon emissions claims or methodologies for calculating emissions related to biomass.

Laundry electricity consumption based on running washer and dryer one hour each at rates determined by Department of Energy's (DOE) 'Estimating Appliance and Home Electronic Energy Use' (see: <https://energy.gov/energysaver/estimating-appliance-and-home-electronic-energy-use>)

Solar panel generation based on a 300W solar panel operating at the U.S. Energy Information Administration's (EIA) 2017 average capacity factor for the U.S. of 25.7% (https://www.eia.gov/electricity/monthly/epm_table_grapher.php?t=epmt_6_07_b)
