Re: Approve Tariff Changes, Docket No. 19-035-T06 – Application of Rocky Mountain Power for approval of an Indoor Agricultural Lighting Tariff, Electric Service Schedule No. 22 – Compliance Filing.

Recommendation (Approval)

The Division of Public Utilities (“Division”) recommends the Public Service Commission (“Commission) approve, effective August 1, 2019, Rocky Mountain Power’s (“RMP”) proposed tariff sheets containing updates to all surcharge-related electric service schedules to include Schedule 22.

Issue and Discussion

On July 10, 2019, in Docket No. 19-035-T06, the Commission issued an Order approving Electric Service Schedule 22. In this Order, the Commission directed RMP to file updates to all

surcharge-related electric service schedules to include Schedule 22 within 15 days of the date of the Order. These Schedules include Schedules 80, 91, 94, 98, 193, 196, and 197.¹

In Compliance with the Commission Order, On July 25, 2019, RMP filed its proposed tariff updates to Schedules 80, 91, 98, 193, 196, and 197. The update to Electric Service Schedule No. 94, Energy Balancing Account Pilot Program, to reflect Schedule 22 was included in the Company's July 18, 2019 filing in Docket No. 19-035-T11, which also reflects an August 1, 2019 effective date.

The Division reviewed the tariff sheets filed by RMP for compliance and determined that they are in compliance with the above-mentioned Commission Order. Therefore, the Division recommends the Commission approve the updated tariff sheets.

CC: Jana Saba, RMP
Michele Beck, OCS
