Utah Public Service Commission  
UT

Dear Public Service Commission,

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Residential customers are the stock holders and the reason for the existence of the Power Company in first place. Rates should be raised for industrial and commercial customers not the rest of us just because we have less lobbying power.

In addition, the amount paid for wind and solar generated by residential customers should be bought at the going rate of at least \$08.8/kwh. The residential wind and solar sources should be incentivized to offset the detrimental affects of coal and gas CO2 emissions from Coal and natural gas on global climate. Now is the time to start phasing a response to this horrific problem.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Mr. Dave Mills
